COMMENTARY

Our first addition of 2026 was the building supply business, Marshalls (MSLH). Whilst MSLH is traditionally associated with its dominant position in the competitive and cyclical Landscaping sector, it is also UK market leader in the high-margin in-roof Solar (Viridian Solar) and residential Water Management sectors. These segments are expected to deliver the majority of MSLH profits in 2025, with Solar having grown revenue at 32% last year. This growth has both obscured the depth of the cyclical decline and the recovery opportunity in Landscaping which is heavily exposed to Repair Maintenance and Improvement (RMI). A recovery into even modest profitability in Landscaping, which accounts for around 40% of group revenue (we assume margins well below half historic average), would put mid-term consensus earnings expectations in the rear-view mirror.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to generate capital growth over the long term by typically investing at least 70% in a concentrated portfolio of UK listed equities. The Fund follows a value philosophy, looking for situations in which investors have over- reacted to events and valuations no longer reflect company fundamentals. The best opportunities are often found after a period of disappointment has created emotional reasons not to invest. Every investment requires a clear catalyst, which impacts on earnings, or the multiple the market applies to those earnings.
