

# SEQUOIA SOLAR & STORAGE

## PROJECT OVERVIEW

Sequoia is a solar and energy storage project under development on private land with heavily degraded soil in Fresno County, California. The facility will help meet growing energy demand by generating 200 megawatts of homegrown solar energy, enough to power 112,000 homes. It will also help support a more resilient energy grid by delivering excess energy when and where it is needed most.

## PROJECT HIGHLIGHTS

**Solar Capacity:** 200 megawatts

**Storage Capacity:** 200 megawatts

**Location:** Fresno County (CA-13)

**Workforce:** 500 jobs at peak construction

## INVESTING IN CALIFORNIA'S FUTURE

The Heartland project represents a **\$735 million private investment** in California's energy future.

Additionally, the project will contribute **\$53.2 million in property taxes over its lifetime**, supporting first responders, education, and other community services.

## PROJECT TIMELINE

**Solar commercial operation target:** 2029

**Storage commercial operation target:** 2031
