Survey Toplines — Alaska — At-Large Congressional District

Statewide Benchmark Survey · 2026 Election Cycle

Methodology

Survey of 546 Likely 2026 General Voters statewide; margin of error ± 4.19 percentage points; field date: 07/13-16/2026.

All percentages are weighted to the study's demographic and partisan quota targets. Each figure is the Total % of the stated base, rounded to whole numbers, so responses may not sum to 100%. Multiple-response questions (e.g., top-three issue selection and racial identification) and per-candidate blocks may sum to more than 100. Aggregate rows (e.g., TOTAL DEMOCRAT) are sums of the categories that follow and are shaded for reference. Question codes in brackets match the analysis report and banner books. This study utilizes a multi-frame, probability-based sampling design combining live telephone calls and Short Message Service (SMS) outreach. To correct for non-response bias, the final sample was adjusted against U.S. Census Bureau and national voter databases to ensure accurate representation across core demographics, specifically gender, geographic region, age, race and ethnicity, political affiliation, educational attainment, household income, and population density, ensuring statistically valid generalizability.
