Collaborative Engagement

Student-centered, educator-led network structures identify institutional needs.

Prioritize and organize around evidence-based strategies.

Governance structure and executive director facilitate design and implementation

Educator Support

Multi-institutional, Collaborative-wide **Communities of Practice** provide structure and support for the design, implementation, and assessment of **evidence-based teaching and learning practices.**

Alternative Grading	Corequisite Courses
Ascend	Students as Partners

Institutional groups of faculty, staff, students, and administrators support institution-specific adaptation and support.

Institutional Transformation

Students are integral and valued members of the STEM community.

Students are empowered to confidently pursue their unique STEM pathway.

Course design and support structures center students.

Student Success

STEM students supported and empowered to succeed and achieve.

Assessment & Iteration
