

SLIMCEIL CHANNEL

M355

Leaders in Innovative
Building Products

PRODUCT DESCRIPTION

Using just two components - the Slimceil channel and bracket, the Slimceil system allows for ceilings to be constructed with as little as 37-108mm cavities. Slimceil is suitable for all cladding types, with a secure locking system and is engineered to support a maximum ceiling load of 85kg/m2.*

The Studco SlimCeil Ceiling System consists of a C-channel section and a series of four brackets, designed to provide adjustable stand-off points for fixing the channel. The bracket range provides an overlapping series that covers ceiling cavities from 37mm through to 108mm. It's the simple, easy to install and fast answer to small ceiling cavities. Greater load strength can be achieved using the SlimCeil system.

**Brackets fixed at 900mm centres and ceiling channel fixed at 450mm centres*

FEATURES

- Code compliant to NCC 2011 Section J (BCA 2011) Energy Efficiency criteria.
- Fully adjustable for use on uneven surfaces.
- Suitable for compact ceiling cavities.
- Manufactured in Australia from high quality, Australian steel.

INSTALLATION

Once the SlimCeil M324 brackets are fixed to the concrete slab above using suitable fixings, the Studco SlimCeil M355 channel is inserted into the brackets and screwed in, achieving a secure and permanent fixing that can support a wide variety of lining board types and weights.

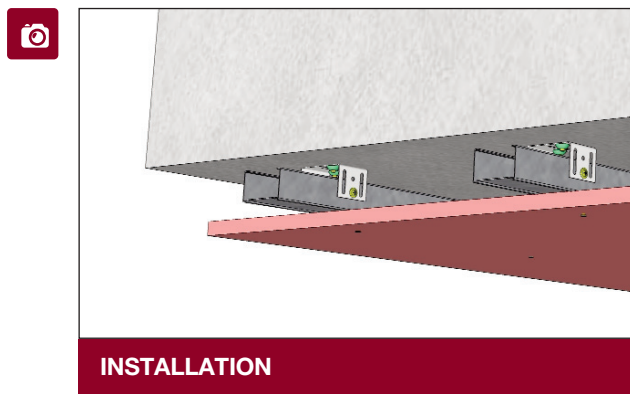

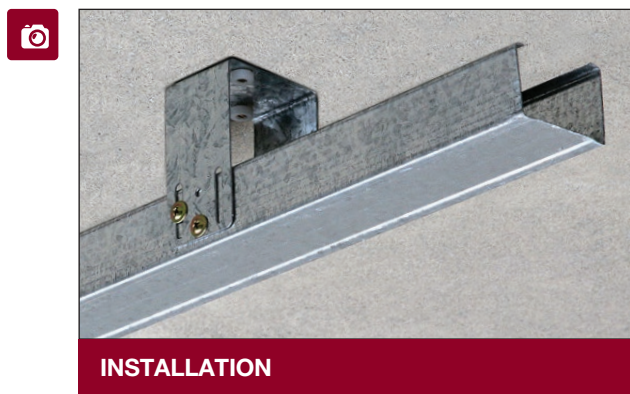

APPLICATION

For use within energy efficient wall system applications.
