

Product Datasheet

Description

AluBase® Shadowline is a modern skirting board designed for contemporary interior design. The minimalist finish is equipped to suit modern home finishes and commercial office environments. The shadowline details draws a defined perimeter around the interior space.

Made from aluminium, this skirting is resistant to the wear-and-tear for high traffic areas. The surface requires no further treatment prior to installation and can be left as an accent feature or is ready-to-paint after installation in the wall.

Additional joiner pieces make the connection of both straight and corner sections simple. The visual finish is curated with EzyJamb® door frames in mind as two distinct options are available to stop-off the skirting where it meets an architectural opening.

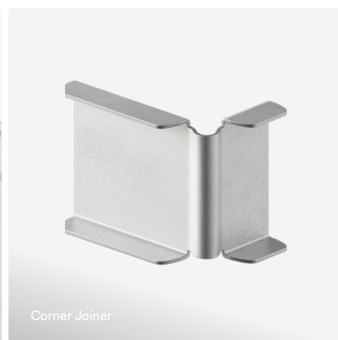

Features

- Manufactured from high-grade aluminium
- Resistant to wear and impact
- Concealed fixing system for hidden connection with plasterboard
- Perforated beads for trowelled finish
- Supplied in natural anodised finish
- Seamless joins made easy with optional joiners
- Eliminates risk of cracking common in MDF alternatives
