One Farm Record, Six Use Cases

Collect Once. Verify Once. Use Everywhere.

You're already in the field, writing the prescription, texting a photo when something looks off. That same visit can build a record your farmer hands a lender, an auditor, or FSA on the spot.

WHAT IT MEANS FOR YOUR BUSINESS

- **No new visits, more value.** Log the scouting trip once, and it becomes the proof behind six different asks your clients face every year.
- **You become the trusted source.** When a co-op, lender, or certifier needs proof of a practice. happened, your name is behind it.
- **Fewer repeat calls.** Once the answer is documented, farmers stop texting you the same question twice.
- **A client conversation, not a chore.** Position documentation as part of the consulting value you already deliver.

ONE RECORD, SIX WAYS IT PAYS OFF FOR YOUR FARMER CLIENTS

01 Operating Loan Applications One clean record beats a shoebox of receipts at renewal time.	02 Conservation Program Enrollment Documented practice history speeds up EQIP, CSP, and FSA applications.
03 On-Farm Trial Participation Log field data once, share it with every university or company trial.	04 Incentive Payment Verification 45Z and carbon programs pay based on documented, verifiable practices.
05 Third-Party Certifier Compliance One verified source answers every organic or sustainability auditor.	06 Crop Insurance Documentation Planting dates and practices on record speed up claims and adjuster reviews.

Six asks, one record. No extra windshield time.
