

# Security Compliance, Simplified.

Make every Security Report clear, structured, and actionable.

*For CISOs & Compliance Leaders*

## The Compliance Reality

Security compliance isn't about checklists, it's about clarity.

Most organizations manage multiple frameworks, scattered security reports, and disconnected evidence. As tasks pile up, visibility breaks down and decisions slow.

The result is unclear compliance status, hidden risk, and difficulty explaining outcomes to auditors and leadership.

CISOCHECK brings clarity, without new tools, integrations, or data movement.

## What CISOCHECK Does

### Ingest & Extract

Upload any audit or assessment report. CISOCHECK automatically extracts findings and scope.

### Normalize & Map

Findings are mapped across 200+ global compliance frameworks in seconds.

### Prioritize & Act

Understand what matters most based on risk, threat context, and control importance.

### Report & Demonstrate

Generate clear summaries and maintain full visibility for audits, executives, and boards.

## Why CISOCHECK

CISOCHECK addresses the hardest part of compliance: **Making sense of audits**. It brings structure & alignment to complex findings, offering clarity and direction without adding operational overhead.

| Cloud agnostic

| Zero-integration

| Supports 200+ frameworks

| Action-driven

**Integrates effortlessly in your environment, Cloud or On-Premises, with simple setup and full use of your existing compliance data.**

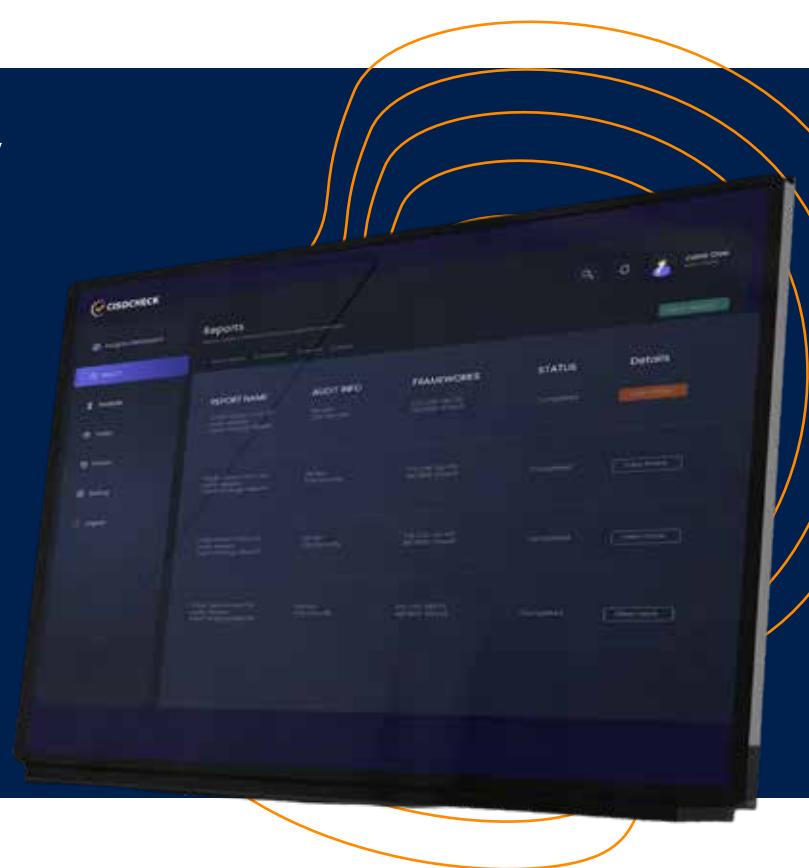

Audits and assessments reflect your security posture. CISOCHECK makes that posture visible, explainable, and usable across global compliance frameworks.
