

# See Your Entire GRC Posture in One View

CISOCHECK turns audits, security reports, assessments, evidence, and IT asset context into a **live view** of GRC posture.

## Turn static Reports into Actionable Clarity

From upload to insight, CISOCHECK keeps your Compliance program moving.

## Why CISOCHECK?

200+ Compliance Framework Library.

Deploy in a Day

100% Data stays in your Control in your Environment

No Integration Required

Unlimited Platform Usage

## From IT Metrics to Business Impact

Not all vulnerabilities carry the same weight. CISOCHECK replaces fragmented technical vulnerabilities with true risk context by linking your IT assets directly to the business units they support.

**Visualize Cascading Risk**  
Instantly trace how a single compromised asset impacts critical operations across your entire enterprise

**Prioritize Strategically**  
Focus of remediation strictly on critical services that drive strategic business outcomes

**Ensure Operational Resilience**  
Guarantee the availability of your critical business units by mapping digital dependencies to isolate threats instantly.

**One platform for the entire compliance loop**  
CISOCHECK streamlines your entire GRC workflow with a single, seamless layer of intelligence
