Complex solution

The screenshot displays a sophisticated GIS application interface. On the left, a sidebar titled "Přizpůsobení mapového podkladu" (Map background customization) lists various data layers with checkboxes, including "Silniční a dálniční síť", "Kilometrovníky", "DTM Pardubický kraj", "ZPS linie a body", "ZPS plochy barevné", "DI veřejná část", "TI veřejná část", "Domovní přípojky inženýrských sítí", "Geodetické a kartografické prvky", "Dopravní infrastruktura - primární", and "Technická infrastruktura - primární". Below this is a section for "Ostatní vrstvy" (Other layers) with a checkbox for "Mapa KN - dle kvality".

The main workspace is divided into two panels. The left panel shows a 2D map with a network of roads and infrastructure, overlaid with a vertical line of colored points (yellow, green, red). The right panel displays a 3D point cloud of a road and surrounding vegetation. The top of the interface features a series of tabs for different data types: SDZstanoviste, SDZtabule, DZ, SVO, ZAB, VDZ, BV, PV, PROP, PLO, and ZDI. Below these tabs is a toolbar with icons for various functions like "Všechna data", "Výběr objektů", "Měření", "Staničení", "Skrýt popisky", "Styl mapy", "Nahlížení d", "Všechna data", "Panorama", "Pointcloudy", "Měření", and "Styl podkl".

At the bottom, a data table is visible with columns for "ID", "Evidenční ...", "Název", "Šířka", "Barva", "Délka (m)", "Plocha (m2)", "Kadence", and "Pro".
