

Paskapoo Entrance Sign Restoration Complete

The restored Paskapoo entrance sign and surrounding landscaping.

The CRRA is pleased to share that restoration of the Paskapoo community entrance sign has been completed, refreshing an important feature at one of Cougar Ridge's entrances.

The sign frontage had deteriorated due to rain and other weather exposure. As part of the CRRA's mandate to maintain and enhance designated community entrance features and signage, the Board's Greenspace Committee coordinated the restoration.

Restoration Work

The Greenspace Committee sought multiple bids for the work, with Calgary Parging selected as the successful vendor.

The work was completed without damage to the flower beds in front of the sign, which was greatly appreciated.

The Greenspace Committee is working with Pixie Gardens to rearrange the tall purple flowers that slightly cover the lower letters of the sign. The flowers have now been cut back for the winter and will be repositioned in the spring to ensure that all the sign letters are clearly visible.

A Refreshed Entrance for Cougar Ridge

The Paskapoo entrance sign is an important community feature, contributing to the appearance and character of the neighbourhood. Restoring helps preserve this shared asset and maintain a welcoming entrance for residents and visitors.

The CRRA is very happy with the outcome and thanks Calgary Parging for its work.

The CRRA will continue to maintain and enhance designated community entrance features and landscaped areas in keeping with its mandate and commitment to responsible stewardship of community resources.
