REPORT SUMMARY

Introduction

Disability Service Provider Network (DSPN) Roadside Facilities (RF) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Safety Rest Area Maintenance Program. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs.

The water meter readings form was added to FAMIS in June 2020. A monthly work order is sent out to assigned service providers as a reminder to enter water meter readings for the month. Hwy traffic data was added to FAMIS January 2021.

The coronavirus had an impact on water usage at rest areas and highway traffic in CY 2020 as travel was reduced due to the pandemic. CY 2021, water usage and highway traffic volume returned to near pre-pandemic numbers.

This report is organized into the following sections:

Water Comparison Report: 2023/2022/2021/2020
Traffic Comparison Report: 2023/2022/2021/2020
Traffic vs. FY 2023 Budget Report
Traffic Count/Water Usage by County Summary

"Water Comparison Report" Summary

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site for the calendar years 2020 to 2023. Overall, water usage for 2023 averaged 60,868 gallons per month per site. This is - 6.45% less than 2022, which averaged 65,067 per month per site.

Note: 2020 was the first year of the pandemic and rest area usage was greatly decreased.

Between 2022 and 2023, the following individual sites experienced an increase in water usage greater than 10%:

<u>County</u>	<u>Site name</u>	<u>% Change Between 2023 vs. 2022</u>
Grant	SRA 106 Dickeyville	16%
Juneau	SRA 10 Mauston	14%
Manitowoc	SRA 51 Maribel	25%
Walworth	SRA 36 East Troy	15%

Potential explanations:

- ❖ SRA 106 Dickeyville – New well pump installed.
- ❖ SRA 10 Mauston – Influx of buses in April and May 2023.
- ❖ SRA 51 Maribel – Increase in traffic.
- ❖ SRA 36 East Troy – Increase in traffic.

The following sites experienced a decrease greater than 10% in water use.

County	Site name	% Change Between 2023 vs. 2022
Columbia	SRA 12 Poynette	-11%
Columbia	SRA 11 New Auburn	-22%
Barron	SRA 34 Chetek	-38%
Douglas	SRA 23 Superior	-11%
Jackson	SRA 54 Black River Falls	-36%
Jefferson	SRA 13 Lake Mills	-11%
Jefferson	SRA 14 Johnson Creek	-12%
Marquette	SRA 82 Westfield	-16%
Monroe	SRA 16 Sparta	-11%
Rock	SRA 17 Janesville	-11%

Potential explanations:

- ❖ SRA 12 Poynette – No reading in October due to pressure tank failing.
- ❖ SRA 11 New Auburn – Well shut down December 2022 through October 2023 for high nitrate.
- ❖ SRA 34 Chetek – Plumbing issues in August 2023.
- ❖ SRA 23 Superior – Potential plumbing issues.
- ❖ SRA 54 Black River Falls – Plumbing issues March and August 2023.
- ❖ SRA 13 Lake Mills – Water heater stopped working and was repaired May 2023.
- ❖ SRA 14 Johnson Creek – Potential decrease in traffic.
- ❖ SRA 82 Westfield – Potential decrease in traffic.
- ❖ SRA 16 Sparta – ADA stall in men’s restroom clogged March 2023.
- ❖ SRA 17 Janesville – Decrease in traffic.

"Traffic Comparison Report" Summary

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for calendar years 2020 through 2023 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2023 was 660 cars per-site per-day or an average of 1,650 people per-site per-day. The ADT in 2023 was less than 2022 by -0.72%.

Note: 2020 was the first year of the pandemic and rest area usage was greatly decreased.

No sites experienced a decrease greater than 10% in ADT in 2023 vs. 2022.

The sites below experienced an increase greater than 10% in ADT in 2023 vs. 2022.

County	Site name	% Change Between 2023 vs. 2022
Barron	SRA 34 Chetek	10%
Columbia	SRA 11 Portage	18%
Douglas	SRA 23 Superior	13%
Iron	SRA 103 Hurley	59%
Manitowoc	SRA 51 Maribel	19%
Marquette	SRA 82 Westfield	13%

Traffic vs. Budget Cost Comparison Report Summary

This report covers the period of December 2022 through November 2023. Compared are the Average Daily Traffic vehicle totals and concurrent budget expenditures for all ongoing operational activities by crews and services provided by outside vendors. In any given year, expenses will vary at safety rest area sites due to budget savings on one or more line items or higher expenditures due to unforeseen needs such as well pressure tank replacements, faucet replacements, furnace failures, valve replacements, etc.

The comparison report features two sections: one sorted by traffic volume (ADT), and one sorted by budget/operational costs reflecting the per vehicle cost. Traffic data anomalies are footnoted at the bottom of the report using key symbols for reference.

"Traffic Count/Water Usage by County Report" Summary

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment are noted; frequent equipment problems may cause the data to be distorted and may help to explain why the traffic data may be higher or lower than the previous month.

The data categories represent:

CombADT – the average daily number of cars and trucks counted at continuously counted sites (Note: no car or truck individual counts were taken in 2020, 2021, 2022 and 2023).

Total ADT – the average daily count of both cars and trucks at all counted sites.

Monthly H2O Usage – the total number of gallons of water used during the month.

Notes - Notes indicate if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

WisDOT discontinued forwarding data from the Continuous Mainline traffic counters in CY 2012. DSPN RF had received data from only a few selected Continuous Mainline counters in previous years.

Data Management

The WisDOT Information Technology and Management Section forwards traffic data reports to DSPN RF monthly. The monthly reports include permanently counted sites including year-round sites. The monthly average daily traffic (MADT) figure is entered into FAMIS for permanent counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water usage is recorded monthly at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. All report data is converted and entered in gallon quantities. Monthly water readings are entered into FAMIS.

FAMIS is a cloud-based property and asset management system. (*Accruent is the company that owns the FAMIS software. WisDOT Roadside Facilities subscribes to the system.*) Historical data, documents and records are maintained in FAMIS and accessible for program and budgetary planning purposes by WisDOT, DSPN RF and Service Providers.

Analytical Data Reports

The traffic data has been useful to Roadside Facilities program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly and daily traffic variations used to develop maintenance crew work schedules at the roadside facilities. DSPN RF has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

Water Comparison Report

Calendar Year 2020, 2021, 2022 and 2023 Average Monthly Gallons of Water Usage Comparison

Rest Area Maintenance Program CY 2023 Traffic and FY 2023 Budget Cost Comparison

Report Information: The Operating CCLM (Custodial Care and Landscape Maintenance) services by the maintenance service provider Budget for paired sites (i.e. SRA 11 & SRA 12) is shown with an equal split for the December 2022-November 2023 Period (CY2023). Paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment over those serving as a single site. The Operating Budget also includes Special Vendor Service costs for trash, plumbing, electrical, HVAC, septic, well services, etc. and are noted as per the range of these costs below; these costs are dependent on each site's mechanical systems. This report shall be used as a reference tool.
