REPORT SUMMARY

Introduction

Disability Service Provider Network (DSPN) Roadside Facilities (RF) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Roadside Facilities Maintenance Program. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs. This report is organized into the following sections:

Water Comparison Report: 2019/2018/2017/2016
Traffic Comparison Report: 2019/2018/2017/2016
Traffic vs. FY 2019 Budget Report
Traffic Count/Water Usage by County Summary

"Water Comparison Report" Summary

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site from 2016 to 2019. Overall, water usage for 2019 averaged 60,509 gallons per month per site. This is 6.70% less than 2018, which averaged 64,853 per month per site.

Between 2018 and 2019, the following individual sites experienced an increase in water usage greater than 15%:

County	Site name	% Change Between 2019 vs. 2018
Jackson	RA 53	45.25%
LaCrosse	RA 15	21.04%

Potential explanations:

- ❖ Issue with flush valve being stuck in June at Jackson County, RA 53.
- ❖ Potential increase of traffic at LaCrosse County, RA 15.

The following sites experienced a decrease greater than 15% in water use.

County	Site name	% Change Between 2019 vs. 2018
Columbia	RA 11	-42.89%
Manitowoc	W-4	-31.50%
Walworth	RA 35	-26.49%
Rock	RA 17	-22.53%
Rock	RA 22	-19.07%

Potential explanations:

- ❖ A slight decrease in excessive purging to correct well issues. Slight decrease in traffic volume at RA 11 in Columbia County.
- ❖ Potential decrease in traffic volume at W-4 (Lake Shore) in Manitowoc County.
- ❖ Slight decrease in traffic volume at RA 35 in Walworth County.
- ❖ Rest Area 17 in Rock County was closed for most of November 2019 due to Highway construction.
- ❖ Slight decrease in traffic volume at RA 22 in Rock County.

"Traffic Comparison Report" Summary

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for Calendar Years 2016 to 2019 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2019 was 666 cars per-site per-day or an average of 1,665 people per-site per-day. Overall, the ADT in 2019 was lower than 2018 by -.19% (one car).

The sites below experienced an increase greater than fifteen percent in ADT in 2019 vs. 2018.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2019 vs. 2018</u>
Iron	RA 103	20.59%

Potential explanations:

- ❖ Increase in traffic volume at RA 103 in Iron County possibly due to DMV counter in the rest area.

The sites below experienced a decrease greater than fifteen percent in ADT in 2019 vs. 2018.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2019 vs. 2018</u>
Rock	RA 22	-22.58%
Rock	RA 17	-22.75%

Potential explanations:

- ❖ Slight decrease in traffic volume at RA 22 in Rock County.
- ❖ Rest Area 17 in Rock County was closed for most of November 2019 due to Highway construction.

Traffic vs. Budget Cost Comparison

This report covers the period of December 2018 through November 2019. Compared are the Average Daily Traffic vehicle totals and concurrent budget expenditures for all ongoing operational activities by crews and services provided by outside vendors. In any given year, expenses will vary at rest area sites due to budget savings on one or more line items or higher expenditures due to unforeseen needs such as well pressure tank replacements, faucet replacements, furnace failures, valve replacements, etc.

The comparison report features two sections: one sorted by traffic volume (ADT) and one sorted by budget/operational costs reflecting the per vehicle cost. Traffic data anomalies are footnoted at the bottom of the report using key symbols for reference.

"Traffic Count/Water Usage Report" Summary

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment is noted; frequent equipment problems may cause the data to be distorted and may help to explain why the traffic may be somewhat higher or lower than the previous month.

The data categories represent:

CombADT – the average daily number of cars and trucks counted at continuously counted sites (Note: no car or truck individual counts were taken in 2016, 2017, 2018 and 2019).

Total ADT – the average daily count of both cars and trucks at all counted sites.

Monthly H2O Usage – the total number of gallons of water used during the month.
Notes - Notes indicate if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

WisDOT discontinued forwarding data from the Continuous Mainline traffic counters in CY 2012. DSPN RF had received data from only a few selected Continuous Mainline counters in previous years.

Data Management

The information is processed using SQL database software. Information for each site is entered into one database file then linked to the data file. Reports are produced grouped by county, listing site information and specific traffic and/or water data.

The WisDOT Information Technology and Management Section forwards traffic data reports to DSPN RF monthly. The monthly reports include permanently counted sites including year-round sites. The monthly average daily traffic (MADT) figure is entered for permanent counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water use is recorded daily at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. All report data is converted and presented in gallon quantities. Monthly water reading reports are sent to DSPN RF for processing and filing by the 15th of every month by the rest area manager. DSPN RF ensures that all reports are received and entered in an accurate and timely manner.

Analytical Data Reports

The traffic data has been useful to the Roadside Facilities program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly and daily traffic variations used to develop maintenance crew work schedules at the roadside facilities. DSPN RF has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

Rest Area Maintenance Program CY 2019 Traffic and FY 2019 Budget Cost Comparison

Report Information: The Operating CCLM (Custodial Care and Landscape Maintenance) services by the maintenance service provider Budget for paired sites (i.e. RA 11 & RA 12) is shown with an equal split for the December 2018-November 2019 Period (CY2019). Paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment over those serving as a single site. The Operating Budget also includes Special Vendor Service costs for trash, plumbing, electrical, HVAC, septic, well services, etc. and are noted as per the range of these costs below; these costs are dependent on each site's mechanical systems. This report shall be used as a reference tool.
