REPORT SUMMARY

Introduction

Disability Service Provider Network (DSPN) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Roadside Facilities Maintenance Program. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs. This report is organized into the following sections:

Water Comparison Report: 2018/2017/2016/2015
Traffic Comparison Report: 2018/2017/2016/2015
Traffic vs. FY 2018 Budget Report
Traffic Count/Water Usage by County Summary

"Water Comparison Report" Summary

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site from 2015 to 2018. Overall, water usage for 2018 averaged 64,853 gallons per month per site. This is 5.43% higher than 2017, which averaged 61,510 per month per site. Between 2017 and 2018, the following individual sites experienced an increase in water usage greater than 15%:

<u>County</u>	<u>Site name</u>	<u>% Change Between 2018 vs. 2017</u>
Rock	RA 17	145.39%
Manitowoc	W-4	131.49%

Potential explanations:

- ❖ Water readings for RA 17 in Juneau County during June-November 2017 were not accurate and not included in last year's report.
- ❖ Potential increase of traffic volume at W-4 in Manitowoc County.

The following sites experienced a decrease greater than 15% in water use.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2018 vs. 2017</u>
Columbia	RA 11	-25.66%
Grant	RA 106	-17.06%

Potential explanations:

- ❖ A slight decrease in excessive purging to correct well issues. Slight decrease in traffic volume at RA 11 in Columbia County.
- ❖ Slight decrease in traffic volume at RA 106 in Grant County.
- ❖ Rest area 101 in Waupaca County permanently closed December 2017 and is not included in this report.

"Traffic Comparison Report" Summary

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for Calendar Years 2015 to 2018 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2018 was 667 cars per-site per-day or an average of 1,668 people per-site per-day. Overall, the ADT in 2018 was slightly lower than 2017 by 3.47% -- which is an average of 24 less cars per-site per-day and an average of 50 less people per-site per-day.

The sites below experienced an increase greater than fifteen percent in ADT in 2018 vs. 2017.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2018 vs. 2017</u>
LaCrosse	RA 15	100%
Monroe	RA 16	100%
Iron	RA 103	19.30%

Potential explanations:

- ❖ No traffic data recorded during 2015, 2016, and 2017 at RA 15 in LaCrosse County.
- ❖ No traffic data recorded during 2015, 2016, and 2017 at RA 16 in Monroe County.
- ❖ Increase in traffic volume at RA 103 in Iron County possibly due to DMV counter in the rest area.

The sites below experienced a decrease greater than fifteen percent in ADT in 2018 vs. 2017.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2018 vs. 2017</u>
Jackson	RA 54	-17.69%

Potential explanations:

- ❖ A decrease in traffic volume at RA 54 in Jackson County.
- ❖ Rest area 101 in Waupaca County permanently closed December 2017 and is not included in this report.

Traffic vs. Budget Cost Comparison

This report covers the period of December 2017 through November 2018. Compared are the Average Daily Traffic vehicle totals and concurrent budget expenditures for all ongoing operational activities by crews and services provided by outside vendors. In any given year, expenses will vary at rest area sites due to budget savings on one or more line items or higher expenditures due to unforeseen needs such as well pressure tank replacements, faucet replacements, furnace failures, valve replacements, etc.

The comparison report features two sections: one sorted by traffic volume (ADT) and one sorted by budget/operational costs reflecting the per vehicle cost. Traffic data anomalies are footnoted at the bottom of the report using key symbols for reference.

"Traffic Count/Water Usage Report" Summary

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment is noted; frequent equipment problems may cause the data to be distorted and may help to explain why the traffic may be somewhat higher or lower than the previous month.

The data categories represent:

CombADT – the average daily number of cars and trucks counted at continuously counted sites (Note: no car or truck individual counts were taken in 2015, 2016, 2017 and 2018)

Total ADT – the average daily count of both cars and trucks at all counted sites

Monthly H2O Usage – the total number of gallons of water used during the month

Notes - Notes indicate if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

WisDOT discontinued forwarding data from the Continuous Mainline traffic counters in CY 2012. DSPN had received data from only a few selected Continuous Mainline counters in previous years.

Data Management

The information is processed using SQL database software. Information for each site is entered into one database file then linked to the data file. Reports are produced grouped by county, listing site information and specific traffic and/or water data.

The WisDOT Information Technology and Management Section forwards traffic data reports to DSPN monthly. The monthly reports include permanently counted sites including year-round sites. The monthly average daily traffic (MADT) figure is entered for permanent counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water use is recorded daily at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. All report data is converted and presented in gallon quantities. Monthly water reading reports are sent to DSPN for processing and filing by the 15th of every month by the rest area manager. DSPN ensures that all reports are received in an accurate and timely manner.

Analytical Data Reports

The traffic data has been useful to the Roadside Facilities program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly and daily traffic variations used to develop maintenance crew work schedules at the roadside facilities. DSPN has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

Water Comparison Report

Calendar Years 2015, 2016, 2017 and 2018 Average Monthly Gallons of Water Usage Comparison

County	Site name	2015 AVG Water	2016 AVG Water	2017 AVG Water	2018 AVG Water	% Change	Notes

CY 2018 Traffic and FY 2018 Budget Cost Comparison

Report Information: The Operating CCLM (Custodial Care and Landscape Maintenance services by the maintenance service provider) Budget for paired sites (i.e. RA 11 & RA 12) is shown with an equal split for the December 2017-November 2018 Period (CY2018). Paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment over those serving as a single site. The Operating Budget also includes Special Vendor Service costs for trash, plumbing, electrical, HVAC, septic, well services, etc. and are noted as per the range of these costs below; these costs are dependent on each site's mechanical systems. This report shall be used as a reference tool.
