## REPORT SUMMARY

### *Introduction*

Rehabilitation For Wisconsin, Inc. (RFW) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Rest Area Maintenance Program. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs. This report is organized into the following sections:

**Water Comparison Report: 2016/2015/2014/2013**

**Traffic Comparison Report: 2016/2015/2014/2013**

**Traffic vs. FY 2016 Budget Report**

**Traffic Count/Water Usage by County Summary**

### *"Water Comparison Report" Summary*

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site from 2013 to 2016. Overall, water usage for 2016 averaged 59,751 gallons per month per site. This is .24% higher than 2015, which averaged 59,609 per month per site. Between 2015 and 2016, the following individual sites experienced an increase in water usage greater than 15%:

<u>County</u>	<u>Site name</u>	<u>% Change Between 2016 vs. 2015</u>
Jackson	RA 53	43.16%

#### Potential explanations:

- ❖ An increase in traffic volume at RA 53 in Jackson County.

The following sites experienced a decrease greater than 15% in water use.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2016 vs. 2015</u>
Jefferson	RA 14	-21.70%
Juneau	RA 9	-19.30%
Juneau	RA 10	-25.91%
LaCrosse	RA 31	-100%
Manitowoc	W-4	-21.38%
Marquette	RA 81	-20.28%
Waupaca	RA 101	-41.80%

#### Potential explanations:

- ❖ Less watering at RA 14 in Jefferson County.
- ❖ Less watering at RAs 9 & 10 in Juneau County.
- ❖ Site removed due to construction of rebuild at RA 31 in LaCrosse County.
- ❖ Water data was not collected for September and October for W-4 in Manitowoc County.
- ❖ Less watering at RA 81 in Marquette County.
- ❖ Slight decrease in traffic volume at RA 101 in Waupaca County.

### **"Traffic Comparison Report" Summary**

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for Calendar Years 2013 to 2016 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2016 was 707 cars per-site per-day or an average of 1,768 people per-site per-day. Overall, the ADT in 2016 was slightly higher than 2015 by 9.41% -- which is an average of 61 more cars per-site per-day and an average of 153 more people per-site per-day. The sites below experienced an increase greater than fifteen percent in ADT in 2016 vs. 2015.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2016 vs. 2015</u>
Jackson	RA 53	20.75%

#### Potential explanations:

- ❖ Higher traffic volume at RA 53 in Jackson County.

The sites below experienced greater than fifteen percent decrease in ADT in 2016 vs. 2015.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2016 vs. 2015</u>
LaCrosse	RA 31	-100%

#### Potential explanations:

- ❖ The decrease in traffic volume is due to the building being closed and removed for re-build at RA 31 in LaCrosse County.

### **Traffic vs. Budget Cost Comparison**

This report covers the period of December 2015 through November 2016. Compared are the Average Daily Traffic vehicle totals and concurrent budget expenditures for all ongoing operational activities by crews and services provided by outside vendors. In any given year, expenses will vary at rest area sites due to budget savings on one or more line items or higher expenditures due to unforeseen needs such as well pressure tank replacements, faucet replacements, furnace failures, valve replacements, etc.

The comparison report features two sections: one sorted by traffic volume (ADT) and one sorted by budget/operational costs reflecting the per vehicle cost. Traffic data anomalies are footnoted at the bottom of the report using key symbols for reference.

### **"Traffic Count/Water Usage Report" Summary**

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment is noted; frequent equipment problems may cause the data to be distorted and may help to explain why the traffic may be somewhat higher or lower than the previous month.

The data categories represent:

**CombADT** – the average daily number of cars and trucks counted at continuously counted sites (Note: no car or truck individual counts were taken in 2013, 2014, 2015 and 2016)

**Total ADT** – the average daily count of both cars and trucks at all counted sites

**Monthly H2O Usage** – the total number of gallons of water used during the month

**Notes** - Notes indicate if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

WisDOT discontinued forwarding data from the Continuous Mainline traffic counters in CY 2012. RFW had received data from only a few selected Continuous Mainline counters in previous years.

### ***Data Management***

The information is processed using SQL database software. Information for each site is entered into one database file then linked to the data file. Reports are produced grouped by county, listing site information and specific traffic and/or water data.

The WisDOT Information Technology and Management Section forwards traffic data reports to RFW monthly. The monthly reports include permanently counted sites including year-round sites. The monthly average daily traffic (MADT) figure is entered for permanent counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water use is recorded daily at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. All report data is converted and presented in gallon quantities. Monthly water reading reports are sent to RFW for processing and filing by the 15<sup>th</sup> of every month by the rest area manager. RFW ensures that all reports are received in an accurate and timely manner.

### ***Analytical Data Reports***

The traffic data has been useful to the RAM program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly and daily traffic variations used to develop maintenance crew work schedules at the roadside facilities. RFW has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

## Rest Area Maintenance Program CY 2016 Traffic and FY 2016 Budget Cost Comparison

Report Information: The Operating CCLM (Custodial Care and Landscape Maintenance services by the maintenance service provider) Budget for paired sites (i.e. RA 11 & RA 12) is shown with an equal split for the December 2015-November 2016 Period (CY2016). Paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment over those serving as a single site. The Operating Budget also includes Special Vendor Service costs for trash, plumbing, electrical, HVAC, septic, well services, etc. and are noted as per the range of these costs below; these costs are dependent on each site's mechanical systems. This report shall be used as a reference tool.
