## REPORT SUMMARY

### **Introduction**

Rehabilitation For Wisconsin, Inc. (RFW) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Rest Area Maintenance Program. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs. This report is organized into the following sections:

**Water Comparison Report: 2013/2012/2011/2010**

**Traffic Comparison Report: 2013/2012/2011/2010**

**Traffic vs. FY 2013 Budget Report**

**Traffic Count/Water Usage by County Summary**

### **"Water Comparison Report" Summary**

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site from 2010 to 2013. Overall, water usage for 2013 averaged 57,073 gallons per month per site. This is 10.98% lower than 2012, which averaged 64,111 per month per site. Between 2012 and 2013, the following individual sites experienced an increase in water usage greater than 15%:

<b>County</b>	<b>Site name</b>	<b>% Change Between 2013 vs. 2012</b>
Waupaca	RA 101	25.77%
Rock	RA 22	19.67%

#### Potential explanations:

- ❖ Increase in traffic volume at RA 101 in Waupaca County.
- ❖ Increase in traffic volume at RA 22 in Rock County.

The following sites experienced a decrease greater than 15% in water use.

<b>County</b>	<b>Site name</b>	<b>% Change Between 2013 vs. 2012</b>
Jackson	RA 53	-44.71%
Jackson	RA 54	-25.21%
Dunn	RA 62	-21.14%
Juneau	RA 9	-18.87%
Juneau	RA 10	-17.07%

#### Potential explanations:

- ❖ Decrease in traffic volume at RA 53 in Jackson County.
- ❖ RA 54 in Jackson County was closed on two separate occasions for well pump replacement and lift station repairs.
- ❖ Decrease in traffic and the well was shut down from June 6-11 at RA 62 in Dunn County.
- ❖ Decrease in traffic counts due to sites being closed due to construction at RA 9 & 10 in Juneau County.

### **"Traffic Comparison Report" Summary**

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for Calendar Years 2010 to 2013 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2013 was 663 cars per-site per-day or an average of 1,656 people per-

site per-day. Overall, the ADT in 2013 was slightly higher than 2012 by 3.42% -- which is an average of 23 more cars per-site per-day and an average of 56 more people per-site per-day. The sites below experienced a fifteen percent increase or more in ADT in 2013 vs. 2012.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2013 vs. 2012</u>
Rock	RA 17	116.93%
Rock	RA 22	45.34%
Marquette	RA 81	30.92%
Waupaca	RA 101	20.45%

Potential explanations:

- ❖ No data was collected during several months in 2012 and the data collected in November 2013 showed an extremely high daily traffic volume due to a possible equipment malfunction at RA 17 in Rock County.
- ❖ The data collected in November 2013 showed an extremely high daily traffic volume due to a possible equipment malfunction at RA 22 in Rock County.
- ❖ Increase in traffic volume at RA 81 in Marquette County.
- ❖ No data was collected during several months in 2012 and equipment malfunction in December 2013 at RA 101 in Waupaca County.

The sites below experienced greater than fifteen percent decrease in ADT in 2013 vs. 2012.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2013 vs. 2012</u>
Dunn	RA 62	-26.63%
Juneau	RA 10	-16.46%

Potential explanations:

- ❖ A decrease in traffic at RA 62 in Dunn County.
- ❖ A decrease in traffic at RA 10 in Juneau County.

***Traffic vs. Budget Cost Comparison***

This report reflects the December 2012 through November 2013 time period. Compared are the ADT for this period and the concurrent budget expenditures for janitorial, maintenance and landscape services by the service providers and outside vendors (electricians, plumbers, well technicians, etc.) as well. Year to year, expenditures will vary due to unplanned costs such as well head replacements, aquifer “fracking”, pipe replacements, etc.

The comparison report is separated into two sections: sorted by traffic volume and sorted by budget. The report provides a cost per vehicle rate based on the maintenance services budget. Traffic data anomalies are footnoted at the bottom of the report using key symbols for reference.

***"Traffic Count/Water Usage Report" Summary***

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment is noted; frequent equipment problems may cause the data to be distorted and may help to explain why the traffic may be somewhat higher or lower than the previous month.

The data categories represent:

**CombADT** – the average daily number of cars and trucks counted at continuously counted sites (Note: no car or truck individual counts were taken in 2011, 2012 and 2013)

**Total ADT** – the average daily count of both cars and trucks at all counted sites

**Monthly H2O Usage** – the total number of gallons of water used during the month  
**Notes** - Notes indicate if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

WisDOT discontinued forwarding data from the Continuous Mainline traffic counters in CY 2012. RFW had received data from only a few selected Continuous Mainline counters in previous years.

### ***Data Management***

The information is processed using Microsoft Access database software. Information for each site is entered into one database file then linked to the data file. Reports are produced grouped by county, listing site information and specific traffic and/or water data.

The WisDOT Information Technology and Management Section forwards traffic data reports to RFW monthly. The monthly reports include permanently counted sites including year-round sites. The monthly average daily traffic (MADT) figure is entered for permanent counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water use is recorded daily at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. All report data is converted and presented in gallon quantities. Monthly water reading reports are sent to RFW for processing and filing by the 15<sup>th</sup> of every month by the rest area manager. RFW ensures that all reports are received in an accurate and timely manner.

### ***Analytical Data Reports***

The traffic data has been useful to the RAM program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly and daily traffic variations used to develop maintenance crew work schedules at the roadside facilities. RFW has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

## Rest Area Maintenance Program CY 2014 Traffic and FY 2014 Budget Cost Comparison

Report Information: The Operating CCLM (Custodial Care and Landscape Maintenance services by the maintenance service provider) Budget for paired sites (i.e. RA 11 & RA 12) is shown with an equal split for the December/2012-November/2013 Period (CY2013). Paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment over those serving as a single site. The Operating Budget also includes Special Vendor Service costs for trash, plumbing, electrical, HVAC, septic, well services, etc. and are noted as per the range of these costs below; these costs are dependent on each site's mechanical systems. This report shall be used as a reference tool.

Sorted by Traffic (ADT)

Sorted by Budget
