REPORT SUMMARY

Introduction

Rehabilitation For Wisconsin, Inc. (RFW) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Rest Area Maintenance Program. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs. This report is organized into the following sections:

Water Comparison Report: 2011/2010/2009/2008
Traffic Comparison Report: 2011/2010/2009/2008
Traffic vs. FY 2011 Budget Report
Traffic Count/Water Usage by County Summary

"Water Comparison Report" Summary

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site from 2008 to 2011. Overall, water usage for 2011 averaged 69,196 gallons per month per site. This is slightly higher than 2010, which averaged 65,546 per month per site. Between 2010 and 2011, the following individual sites experienced an increase in water usage greater than 15%:

<u>County</u>	<u>Site name</u>	<u>% Change Between 2011 vs. 2010</u>
Jackson	RA 53	56.97%
LaCrosse	RA 15	30.49%
Columbia	RA 12	23.67%
Kenosha	RA 26	19.89%
Jackson	RA 54	19.55%

Potential explanations:

- Capital Water Softener inspected units and found that it was not cycling properly at Columbia County RA 12.
- There were several plumbing issues at Jackson County RAs 53 & 54 which include: broken pipes, installing additional shut-off valves and repair of circulating pumps.
- Kenosha RA 26: Back to normal traffic flow in 2011.
- Toilets were replaced in October and a new well pump was installed at LaCrosse County RA 15.

The following sites experienced a decrease greater than 15% in water use.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2011 vs. 2010</u>
Jefferson	RA 14	-20.48%
Rock	RA 17	-19.92%
Jefferson	RA 13	-19.91%
Douglas	RA 23	-15.78%

Potential explanations:

- Did not have to chlorinate the wells and run water for hours and days to flush system at Jefferson County RA 13 as opposed to 2010.
- Rock RA 17: No lawn watering flowers. They were replaced with perennials.
- A new water meter was installed at Jefferson County RA 14. Actuator for well pumps and well pump gauges were replaced. Lift station dialer failed.
- Douglas RA 23: No lawn watering.

"Traffic Comparison Report" Summary

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for Calendar Years 2008 to 2011 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2011 was 547 cars per-site per-day or an average of 1,368 people per-site per-day. Overall, the ADT in 2011 was lower than 2010 by 12.59%--which is an average of 78 less cars per-site per-day and an average of 195 less people per-site per-day.

The sites below experienced a fifteen percent increase or more in ADT in 2011 vs. 2010.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2011 vs. 2010</u>
N/A	N/A	

The sites below experienced greater than fifteen percent decrease in ADT in 2011 vs. 2010.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2011 vs. 2010</u>
Jackson	RA 54	-29.84%
Dodge	RA 63	-24.29%
Jefferson	RA 13	-24.05%
LaCrosse	RA 31	-22.19%
Jackson	RA 53	-21.09%
Walworth	RA 36	-18.03%
Walworth	RA 35	-16.93%
Marquette	RA 81	-16.48%
Waupaca	RA 101	-16.13%

Potential explanations:

- WisDOT collected insufficient data during September to report. No traffic data was provided to RFW for many rest areas.
- No data was collected in August, September and October for Jackson County RAs 53 & 54.
- No data was collected in August and September for Dodge County RA 63.
- No data was collected in September and there were problems with the counter during August.
- No data was collected in September and there were a significant number of times throughout the year which had counter issues at LaCrosse RA 31
- Walworth RAs 35 & 36:
- No data was collected during September and there were problems with the counter during August at Marquette County RA 81.
- Waupaca RA 101:

Traffic vs. Budget Cost Comparison

This report reflects the December 2010 through November 2011 time period. Compared are the AADT for this time period and the concurrent budget expenditures for janitorial, maintenance and landscaping services by work centers and outside vendors as well. Logically, pairs of rest areas in close geographic proximity, usually find efficiencies in travel and staff support that stand-alone sites do not. In any given year, outside professional services will vary site to site based on age and wear to facility components and physical plant.

The comparison report is separated into two sections: sorted by traffic volume and sorted by budget. The report also provides a cost per vehicle rate based on the maintenance, custodial care and landscape maintenance services budget.

"Traffic Count/Water Usage Report" Summary

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment is noted; frequent equipment problems may cause the data to be distorted slightly and may help to explain why the traffic may be somewhat higher or lower than the previous month.

The data categories represent:

CombADT – the average daily number of cars and trucks counted at continuously counted sites (Note: no car or truck individual counts were taken in 2011)

Total ADT – the average daily count of both cars and trucks at all counted sites

Monthly H2O Usage – the total number of gallons of water used during the month

Notes - Notes indicate if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

Data Management

The information is processed using Microsoft Access database software. Information for each site is entered into one database file then linked to the data file. Reports are produced grouped by county, listing site information and specific traffic and/or water data.

The WisDOT Information Technology and Management Section sends traffic data reports to RFW monthly. The monthly reports include permanently counted sites including year-round sites and continuous mainline highways. The monthly average daily traffic (MADT) figure is entered for permanent counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water use is recorded daily at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. All report data is converted and presented in gallon quantities. Monthly water reading reports are sent to RFW for processing and filing. RFW ensures that all reports are received in an accurate and timely manner.

Analytical Data Reports

The traffic data has been useful to the RAM program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly, and daily traffic variations used to develop maintenance crew work schedules at the roadside facilities. RFW has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

Rest Area Maintenance Program CY 2011 Traffic and CY 2011 Budget Cost Comparison

Report Information: The Operating CCLM (Custodial Care and Landscape Maintenance services by the maintenance service provider) Budget for paired sites (i.e. RA 11 & RA 12) is shown with an equal split. Paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment over those serving as a single site. The Operating Budget also includes Special Vendor Service costs for trash, plumbing, electrical, HVAC, septic, well services, etc. and are noted as per the range of these costs below; these costs are dependent on each site's mechanical systems. This report shall be used as a reference tool.
