# REPORT SUMMARY

## **Introduction**

Rehabilitation For Wisconsin, Inc. (RFW) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Rest Area Maintenance Program. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs. This report is organized into the following sections:

**Water Comparison Report: 2007/2006/2005/2004**  
**Traffic Comparison Report: 2007/2006/2005/2004**  
**Traffic vs. FY 2008 Budget Report**  
**2007 Seasonal Site Traffic Counts: by ADT**  
**Overall Seasonal Site Traffic Counts: by County**  
**Traffic Count/Water Usage by County Summary**

## **"Water Comparison Report" Summary**

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site from 2004 to 2007. Overall, water usage for 2007 averaged 67,746 gallons per month per site. This is higher than 2006, which averaged 65,044 per month per site. Between 2006 and 2007, the following individual sites experienced an increase in water usage greater than 15%:

<u>County</u>	<u>Site name</u>	<u>% Change Between 2007 vs. 2006</u>
Jackson	RA 53	111.39%
LaCrosse	RA 15	25.34%
Dunn	RA 61	22.15%
Walworth	RA 35	18.27%

### Potential explanations:

- Dunn County RA 61 had a slight increase in traffic.
- Jackson County RA 53 left sprinklers on continuously throughout the summer months due to excessive dryness.
- LaCrosse County RA 15 had periodic problems with sloan valves being stuck open.

The following sites experienced a decrease greater than 15% in water use.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2006 vs. 2005</u>
LaFayette	RA 19	-66.75%
Jackson	RA 54	-39.74%
Douglas	WWC 23	-17.44%
Iron	RA 103	-16.72%

### Potential explanations:

- Douglas County WWC 23 had a decrease in traffic.
- Iron County RA 103 had a decrease in traffic.
- Jackson County RA 54 had a suspected meter failure and is to be reviewed in 2008.
- LaFayette County RA 19 area tourism counter was closed, a convenience truck stop opened adjacent to rest area.

**"Traffic Comparison Report" Summary**

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for Calendar Years 2004 to 2007 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2007 was 751 cars per-site per-day or an average of 1,878 people per-site per-day. Overall, the ADT in 2007 was higher than 2006 by 4.31%--which is an average of 31 more cars per-site per-day and an average of 78 more people per-site per-day.

The sites below experienced a ten percent increase in ADT in 2007 vs. 2006.

<u>County</u>	<u>Site name</u>	<u>ADT % Change Between 2007 vs. 2006</u>
LaCrosse	WWC 31	54.01%

The Welcome Center #31 in LaCrosse County counter was removed while site roadway repair projects were being completed. The traffic counter at the Welcome Center was put back in service August 15, 2007.

The sites below experienced greater than ten percent decrease in ADT in 2007 vs. 2006.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2007 vs. 2006</u>
St. Croix	WWC 25	-17.48%
Juneau	RA 9	-11.26%

**Traffic vs. Budget Cost Comparison**

The traffic and budget cost comparison report is a reference tool that has proved to be useful to WisDOT and RFW. The report lists the current year's AADT and the current operating budget for custodial care and landscape maintenance services by the maintenance service provider for each site. The budgeted costs are based on the State's fiscal year of July 1 – June 30. The Rest Area Maintenance Program has eleven (11) pairs of rest areas and ten (10) single rest areas. The paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment. Also included in the operating budgets are "Special Vendor Services" for professional vendors to perform trash pickup, HVAC, electrical, plumbing or septic services, etc. The needs for Special Vendor Services vary greatly from site to site.

The comparison report is separated into two sections: sorted by traffic volume and sorted by budget. The report also provides a cost per vehicle rate based on the custodial care and landscape maintenance services budget.

**Seasonal Site Traffic**

The "CY 2007 Seasonal Site Traffic Report" summarizes the Average Daily Traffic (ADT) for the counted seasonal sites in 2007. The traffic data for the seasonal sites is collected on a per-request basis. Most counts are taken over a two-week period during the busy summer/early fall months. The overall ADT at the 28 seasonal sites counted during 2007 was an average of 122 cars per day which calculates to 305 people stopping at the seasonal sites on an average day. The sites with the highest traffic counts during this period include:

<u>County</u>	<u>Site Name</u>	<u>ADT</u>
Washburn	W-10	323
Lincoln	W-4	294
Douglas	W-3	238
Juneau	W-2	208
Washburn	W-4	205

The "Overall Seasonal Site Traffic Report" lists the ADT counts taken at all of the seasonal sites between calendar years 2003 and 2007.

### ***"Traffic Count/Water Usage Report" Summary***

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment is noted; frequent equipment problems may cause the data to be distorted slightly and may help to explain why the traffic may be somewhat higher or lower than the previous month.

The data categories represent:

**Car ADT** – the average daily number of cars counted at temporary count sites

**Truck ADT** – the average daily number of trucks counted at temporary count sites

**CombADT** – the average daily number of cars and trucks counted at continuously counted sites

**Total ADT** – the average daily count of both cars and trucks at all counted sites

**Monthly H2O Usage** – the total number of gallons of water used during the month

**Notes** - Notes indicate when traffic was counted for temporary count sites; if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

### ***Data Management***

The information is processed using Microsoft ACCESS database software. Information for each site is entered into one database file then linked to the data file. Reports are produced grouped by county, listing site information and specific traffic and/or water data.

The WisDOT Information Technology and Management Section sends traffic data reports to RFW monthly. The monthly reports include permanently counted sites including year-round sites and continuous mainline highways. WisDOT's Bureau of Highway Operations requests annually that various seasonal sites be counted. These counts are also sent to RFW. The monthly average daily traffic (MADT) figure is entered for permanent counter sites while the annual average daily traffic (AADT) is entered for cars and trucks at temporary counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water use is recorded daily at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. All report data is converted and presented in gallon quantities. Monthly water reading reports are sent to RFW for processing and filing. RFW ensures that all reports are received in an accurate and timely manner.

### ***Analytical Data Reports***

The traffic data has been useful to the RAM program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly, daily, and seasonal traffic variations used to develop maintenance crew work schedules at the roadside facilities. RFW has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

In addition, traffic counts are used to direct tourism literature to year-round sites. Sites receive tourism literature based on actual visitors. Using this data allows each site to distribute their limited tourism materials to the traveling public more accurately. Traffic flow charts are made available to rest area maintenance crews.

## Rest Area Maintenance Program 2007 Traffic and FY 2008 Budget Cost Comparison

Report Information: The Operating CCLM (Custodial Care and Landscape Maintenance services by the maintenance service provider) Budget for paired sites (i.e. RA 11 & RA 12) is shown with an equal split. Paired sites have an operational advantage because they are close in proximity to each other and thus may gain certain efficiencies in personnel and equipment over those serving as a single site (generally all WWC sites). The Operating Budget also includes Special Vendor Service costs for trash, plumbing, electrical, HVAC, septic, well services, etc. and are noted as per the range of these costs below; these costs are dependent on each site's mechanical systems. This report shall be used as a reference tool.

Sorted by Traffic Volume
