REPORT SUMMARY

Introduction

Rehabilitation For Wisconsin, Inc. (RFW) maintains a comprehensive database of roadside facility traffic counts and water usage as part of their program management services for the Wisconsin Department of Transportation Rest Area Maintenance Program. RFW began providing this service in 1996 as part of the program record keeping responsibilities. The data collected is used for various purposes including comparing traffic volume to site maintenance costs, adjusting work schedules to accommodate site use, analyzing budgets, and evaluating facility construction needs. This report is organized into the following sections:

Water Comparison Report: 2005/2004/2003/2002
Traffic Comparison Report: 2005/2004/2003/2002
2005 Seasonal Site Traffic Counts: by ADT
Overall Seasonal Site Traffic Counts: by County
Traffic Count/Water Usage by County Summary

"Water Comparison Report" Summary

The "Water Comparison Report" shows the average water usage per month for each year-round rest area site from 2002 to 2005. Overall, water usage for 2005 averaged 70,735 gallons per month per site. This is lower than 2004, which averaged 71,514 per month per site. Between 2004 and 2005, the following individual sites experienced an increase in water usage greater than 10%:

<u>County</u>	<u>Site name</u>	<u>% Change Between 2005 vs. 2004</u>
Dodge	RA 63	13.66%
Dunn	RA 61	39.42%
Dunn	RA 62	55.30%
Jackson	RA 53	21.37%
Jefferson	RA 14	58.81%
Juneau	RA 09	116.56%
Juneau	RA 10	62.29%

Potential explanations:

- Dodge RA 63 – The water usage may have increased due to the 3.42% increase in traffic in 2005.
- Dunn RA 61 – The site had been closed due to road construction in spring 2003 and spring 2004. This caused the average of water usage to be lower than normal those years.
- Dunn 62 – The site had been closed due to road construction in spring 2003 and spring 2004. This caused the average of water usage to be lower than normal for those years.
- Jackson RA 53 – There was extensive watering of the lawn and flowers during the summer that increased water use.
- Jefferson RA 14 – The water usage may have increased due to the 2.98% increase in traffic in 2005.
- Juneau RA 09 – There was almost daily watering of the lawn and flowers during the month of July that increased water use.
- Juneau RA 10 – There was extensive watering of the lawn and flowers during June and July that increased water use.

The following sites experienced a decrease greater than 15% in water use.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2005 vs. 2004</u>
La Crosse	WWC 31	-16.56%
Monroe	RA 16	-21.07%
St. Croix	WWC 25	-20.49%
Walworth	RA 35	-39.60%
Walworth	RA 36	-30.06%

Potential explanations:

- La Crosse RA 31 – Traffic decreased by 10.90% reducing water use.
- Monroe RA 16 – Replaced water pressure tank in September which may potentially cause a reduction in water use.
- St. Croix WWC 25 – Lawn watered less in 2005.
- Walworth RA 35 –The water pressure tank and supply lines were replaced. The site was closed June 13-23, 2005 due to the water supply line upgrades which caused a decrease in water usage.
- Walworth RA 36 – The site was closed July 11-18, 2005 due to water supply line upgrades which decreased the water use.

"Traffic Comparison Report" Summary

The "Traffic Comparison Report" compares the Average Daily Traffic (ADT) for Calendar Years 2002 to 2005 for sites with permanent traffic counters (only located at year-round facilities). The average daily traffic in 2005 was 744 cars per-site per-day or an average of 1,860 people per-site per-day. Overall, the ADT in 2005 was lower than 2004 by 3.89%--which is an average of 30 less cars per-site per-day and an average of 75 less people per-site per-day.

The sites below experienced greater than five percent increase in ADT in 2005 vs. 2004.

<u>County</u>	<u>Site name</u>	<u>ADT % Change Between 2005 vs. 2004</u>
Dunn	RA 62	8.36%
Grant	WWC 106	5.14%

The sites below experienced greater than ten percent decrease in ADT in 2005 vs. 2004.

<u>County</u>	<u>Site name</u>	<u>% Change Between 2005 vs. 2004</u>
La Crosse	RA 31	-10.90%
Manitowoc	RA 51	-11.32%
Manitowoc	RA 52	-13.01%
Marquette	RA 81	-13.81%
Walworth	WWC 24	-26.00%

Seasonal Site Traffic

The "CY 2005 Seasonal Site Traffic Report" summarizes the Average Daily Traffic (ADT) for the counted seasonal sites in 2005. The traffic data for the seasonal sites is collected on a per-request basis. Most counts are taken over a two-week period during the busy summer/early fall months. The sites with the highest traffic counted during this period include Green Lake W-6 with an ADT of 539, Washburn County W-10 with an ADT of 408, and Rusk County W-7 with an ADT of 300. The overall ADT at the seasonal sites counted during 2005 was an average of 162 cars per day which calculates to 405 people stopping at the seasonal sites on average per day.

The "Overall Seasonal Site Traffic Report" lists the ADT counts taken at all of the seasonal sites between calendar years 2001 and 2005.

"Traffic Count/Water Usage Report" Summary

The attached "Traffic Count / Water Usage" report is organized by county, then by site. Each site section lists traffic counts and water data (if applicable) and amenities. The report includes traffic or water notes if pertinent. Occasional problems with the traffic counter equipment is noted; frequent equipment problems may cause the data to be distorted slightly and may help to explain why the traffic may be somewhat higher or lower than the previous month.

The data categories represent:

Car ADT – the average daily number of cars counted at temporary count sites

Truck ADT – the average daily number of trucks counted at temporary count sites

CombADT – the average daily number of cars and trucks counted at continuously counted sites

Total ADT – the average daily count of both cars and trucks at temporary count sites

Monthly H2O Usage – the total number of gallons of water used during the month

Notes - Notes indicate when traffic was counted for temporary count sites; if there were any problems with the equipment and when the traffic counter was down; or any well notes included on the water meter reading sheets.

Data Management

The information is processed using Microsoft ACCESS, database software. Information for each site is entered into one database file then linked to the data file. Reports are produced grouped by county, listing site information and specific traffic and/or water data.

The WisDOT Information Technology and Management Section sends traffic data reports to RFW monthly. The monthly reports include permanently counted sites including year-round sites and continuous mainline highways. WisDOT's Bureau of Highway Operations requests annually that various seasonal sites be counted. These counts are also sent to RFW. The monthly average daily traffic (MADT) figure is entered for permanent counter sites while the annual average daily traffic (AADT) is entered for cars and trucks at temporary counter sites. WisDOT's traffic count year begins in December and ends November of the following year.

Water use is recorded daily at all year-round roadside facilities by the site maintenance personnel. The majority of the facilities' water meters register water use in gallons, while others register the use in cubic feet. The software program RFW uses includes a calculation to report the cubic feet in gallons. Monthly water reading reports are sent to RFW for processing and filing. RFW ensures that all reports are received in an accurate and timely manner. Monthly water use data is reported in gallons.

Analytical Data Reports

The traffic data has been useful to the RAM program managers in evaluating site maintenance funding needs. The traffic counts provide a general comparison for evaluating budgets as well as specific data on hourly, daily, and seasonal traffic variations used to develop maintenance crew work schedules at the roadside facilities. RFW has developed a comparison chart of traffic counts versus site budgeted figures. This has proved useful when negotiating levels of service and budgets for maintenance service provider contracts.

An additional use of the traffic counts is to direct tourism literature to year-round sites. Sites receive tourism literature based on actual visitors. Using this data allows each site to distribute their limited tourism materials to the traveling public more accurately. Traffic flow charts are made available to rest area maintenance crews.

Water Comparison Report

Calendar Years 2002, 2003, 2004 and 2005 Average Monthly Gallons of Water Usage Comparison

County	Site name	2002 AVG Water	2003 AVG Water	2004 AVG Water	2005 AVG Water	% Change 2005/2004	Notes
