

Westwood Post Acute Saves 40 hours/month with Covr's Nursa Integration

KEY IMPACTS

40

Hours saved monthly

Covr's integration with Nursa is super easy to use compared to other services. It saves me about 20 hours every two weeks, so I can manage both staffing and central supply duties, which I didn't have time to do before."

Monica Herrera
Scheduler
Westwood Post Acute

Overview

Westwood Post Acute sources about 20% of its nursing staff through agency partners. Before switching to Covr's integration with Nursa, the team relied on other platforms that were overly complex and difficult to manage. Traditional agencies were also costly and less efficient.

The Solution

By implementing Covr's integration with Nursa, Westwood's scheduler saved up to 40 hours a month, time that now allows her to manage both scheduling and central supply.

The integration also streamlined compliance reporting, making it simple to access nurse profiles and required documentation during state inspections. The ability to view and approve shifts from a mobile device has made the process even more efficient.

Since adopting Covr and Nursa, Monica reports higher nurse quality and reliability and appreciates the ongoing support from Covr's team.
