

OSHA Overhead & Mobile Crane Operator Inspector Course
(4 days)

This intensive two-day program is designed to equip participants with the knowledge and skills required to perform **annual inspections** on both overhead and mobile cranes in accordance with **OSHA regulations** and **ASME B30 standards**. Through a combination of classroom instruction, case studies, and hands-on exercises, attendees will learn how to identify deficiencies, document findings, and ensure cranes remain in safe, compliant operating condition.

By the end of this course, participants will be able to:

- Understand OSHA and ASME inspection criteria for overhead and mobile cranes
- Conduct thorough annual inspections, including structural, mechanical, hydraulic, and electrical components
- Recognize common wear points, damage indicators, and safety hazards
- Properly document inspection results and recommend corrective actions
- Apply best practices for maintaining compliance and reducing liability

Students will receive a Certificate of Completion and handout materials. Students will receive both classroom and practical (hands-on) instruction. Each student will have to score above 80% on the written and practical examinations.

Time: 8 am to 5 pm - 4 days

Tuition: \$1,950.00 per student (Includes 1 Practical Exam and 1 Written Exam)

Location: 1010 64th St NW Albuquerque, NM 87121
