

Patent **Remix** Challenge

Transform NASA Patents into New Solutions

PRIZE AMOUNT

SUBMISSION DUE

\$10,000 | **DEC. 15, 2025**

Bring your brightest ideas to NASA patents and transform them into brand new inventions. Enter to win \$10,000! No experience necessary.

The NASA Patent Remix Challenge invites entrepreneurs, innovators, and creative thinkers to apply NASA's patented technologies to practical applications. Participants will select an existing NASA patent and develop a business or product concept that will be evaluated based on value proposition, business model viability, development feasibility, and quality of presentation. Entries should clearly demonstrate creativity, feasibility, and a compelling rationale for how the concept could create real-world impact, competing for the chance to win \$10,000.

Why should you apply?

- **Turn NASA Tech into Real-World Impact** - Get familiar with innovations from NASA's Tech Transfer Office and reimagine them into startups, products, and solutions that improve lives and enter for the chance to win a \$10,000 prize.
- **Learn by Doing** - Test, iterate, and validate your ideas using proven entrepreneurial methods—practical skills you can apply to any venture or career path.
- **Break Silos, Build Teams** - Collaborate across disciplines with engineers, scientists, business minds, and policy thinkers while connecting with NASA experts and industry mentors.
- **Lead and Innovate for the Future** - Develop leadership, creativity, and problem-solving skills while driving public-private innovation that creates lasting impact.
