

Metrics Real Estate Income Fund

Trust Information

Trust

Metrics Real Estate Income Fund (**MREIF** or the **Fund**) ARSN 671 699 228
APIR Code ETL6345AU

Responsible Entity

Equity Trustees Limited ACN 004 031 298; AFSL 240 975

Trustee of Sub Trust and Master Trust

Perpetual Trust Services Limited ABN 48 000 142 049 (**Trustee**)

Manager of MREIF, Sub Trust and Master Trust

Metrics Credit Partners Pty Ltd ACN 150 646 996, AFSL 416 146 (**Metrics**)

Investment Objective

To actively invest in and manage a diversified portfolio of Australian commercial real estate (CRE) debt assets providing Investors with superior risk-adjusted returns. Metrics seeks to implement active strategies designed to balance delivery of income distributions while seeking to preserve investor capital.

Investment Strategy

Provides exposure to a portfolio of Australian CRE loans diversified by projects, borrowers, sectors, geography, stages of development and position in the capital structure.

The Fund implements this strategy through its indirect investment in MCP Real Estate Debt Fund (**REDF** or the **Master Trust**) via Metrics CRE Multi-Strategy (Debt) Trust (**Sub-Trust**).

Metrics seeks to implement active strategies designed to balance delivery of the Target Return while seeking to preserve investor capital¹. The Fund may also from time to time be exposed to CRE equity where it invests in the Metrics Real Estate Multi-Strategy Fund (ASX:MRE).

Any investments in MRE will not exceed 5% of the Fund's NAV.

Target Return

- ▶ RBA Cash Rate² + 4.00% p.a. net of fees¹.

Investment Highlights

- ▶ Monthly income^{1,4} from exposure to CRE debt investments.
- ▶ Portfolio diversification through CRE debt investments.
- ▶ Proven track record of the Master Trust^{3,4}.
- ▶ Experienced and active management team with a proven track record³.

Fund Update

This report provides investors in the Metrics Real Estate Income Fund with more comprehensive information in respect of the Master Trust. The report supplements prior monthly reporting and provides more detailed data prepared by Metrics in respect of the historical and current performance and portfolio composition of MCP Real Estate Debt Fund in which MREIF via the Metrics CRE Multi-Strategy invests.

Metrics Real Estate Income Fund

Key Investment Criteria

	MARCH 2026
Risk Management	Portfolio diversified across 155 loan assets
Investor Returns	MREIF has delivered: 1 year: RBA Cash Rate +6.89% p.a (net)
Costs to Investor ⁵	Management fees & costs: 0.54% p.a. Performance fees: 0.3% p.a.
Monthly Income ^{3,4}	Monthly cash income distributions There is no guarantee that MREIF will continue to make distributions.

Investment Performance^{3,4,6}

	3 MTH	1YR	3 YR	5 YR	INCEP
Net Return (%)	2.62	10.73	-	-	10.73
Distribution (%)	2.59	10.89	-	-	10.89

Past performance is not a reliable indicator of future performance. Fund inception was 24 March 2025.

(1) This is a target and may not be achieved. (2) As at 31 March 2026 the RBA Cash Rate was 410 bps p.a. (3) Past performance is not a reliable indicator of future performance. (4) The payment of monthly cash income is a goal of the Trust only and neither the Manager nor the Responsible Entity provide any representation or warranty (either express or implied) in relation to the payment of any cash income. (5) The fees and costs disclosed in this document reflect the Product Disclosure Statement issued March 2025. (6) Returns and distributions are based on NAV unit price, after taking into account all fees and costs. Returns are annualised if over one year. Returns over 1 month are compounded monthly. No allowance has been made for entry fees, expenses or taxation.

Metrics Real Estate Income Fund

Market Update

Commercial real estate lending demand has been strong, driven by favourable market fundamentals and particularly focused around addressing a national housing shortage. While the war in Iran is creating some uncertainty about the near-term outlook, it is not likely to change the medium-term fundamentals supporting loan demand.

Higher inflation and interest rates are likely to dampen housing demand in 2026, and higher construction costs could see more construction projects delayed. This could prolong the supply shortfall even longer and may limit any short-term dwelling price risks in the medium term.

Commercial property sectors are also likely to now see softer demand conditions than previously expected in 2026. However, demand in many of these sectors is still recovering from COVID and supply levels are moderate, which should limit downside risk.

While it remains uncertain how long higher oil prices will last, they have had an immediate impact on construction costs. This will have to be tightly managed for existing projects as occurred during COVID, but it could also mean new projects stall in the near-term and lessen medium-term supply levels.

Fund Update^{3,6}

As at March 2026, the Fund delivered a net return of 2.62% over the quarter and 10.73% p.a. since inception.

During the quarter, the Fund (via its investment in the Master Trust) made 10 new investments and exited 6. At quarter-end the Fund held a total of 155 exposures.

New investments were geographically diversified across Australia, NSW (2), QLD (2), VIC (4), SA (1) and WA (1), and all within our preferred Residential and Industrial sectors, which together currently comprises 91% of the portfolio.

At the end of March, the weighted average LVR across the portfolio was 71% and >98% of Fund investments were senior ranking loans. The Fund has a weighted average remaining tenor of 1.1 years and maintains a floating interest rate profile (98% of AUM), meaning the February and March RBA rate increases should affect portfolio yield going forward.

Portfolio Performance (Master Trust)^{2,3,6}

The Master Trust returned 2.47% (net) over the quarter and 9.08% since inception. The Master Trust has continued to outperform its hurdle return of the 3M BBSW plus 500 bps through the cycle², which it has done since inception.

Portfolio Composition (Master Trust)⁸

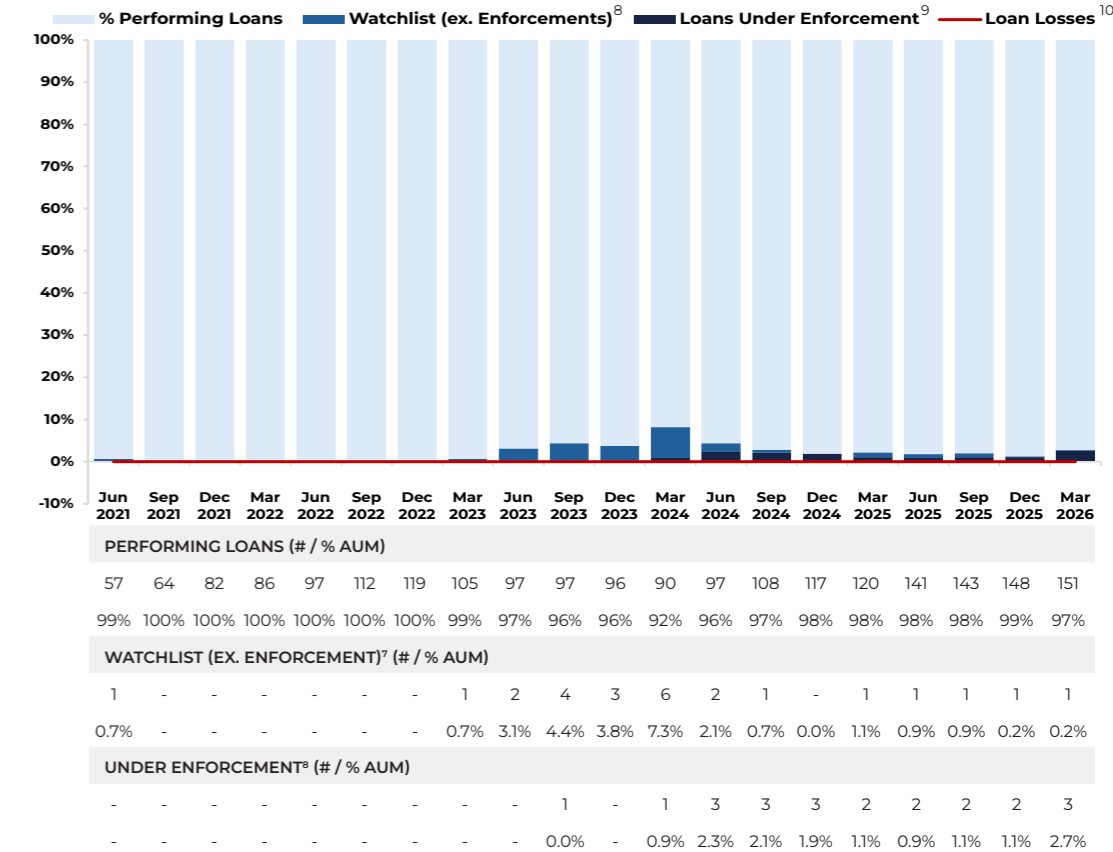

The Master Trust has been consistently exposed to senior ranking instruments and has very limited exposure to subordinated debt. While credit quality is also very important, position in the capital structure is typically an important protection for lenders. Whilst the Master Trust may invest in subordinated loans from time to time, it is expected to maintain its senior ranking profile.

Sector Diversification (Master Trust)⁷

The Master Trust's loan portfolio is diversified principally by borrower, but also sponsor and geography. Metrics lends to large, high quality partners and strategically targets residential and industrial developments which are underpinned by strong demand from Australia's growing urban population and net migration, broad economic growth, logistics and the e-economy. Metrics has historically avoided significant exposures to commercial office, retail, student accommodation or other specialised assets where market depth or alternative use of the asset might be weak. Almost all Metrics lending is in metropolitan areas.

Credit Metrics (Master Trust)^{7,8}

(1) This is a target and may not be achieved. (2) As at 31 March 2026 the 3M BBSW was 431 bps p.a. (3) Past performance is not a reliable indicator of future performance. (6) Returns and distributions are based on NAV unit price, after taking into account all fees and costs. Returns are annualised if over one year. Returns over 1 month are compounded monthly. No allowance has been made for entry fees, expenses or taxation. (7) Exposures measured as a % of AUM, where AUM includes loan commitments and other investments such as cash and committed capital available for investment. (8) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing at or above expectation, with no concerns identified, 2 - Loans performing but below expectations against the Metrics Base Case, 3 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report. (9) Represents loans in respect of which the applicable lender has commenced enforcement of security granted in respect of that loan. (10) Realised credit losses where recovery was less than invested capital.

(8) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing at or above expectation, with no concerns identified, 2 - Loans performing but below expectations against the Metrics Base Case, 3 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report. (9) Represents loans in respect of which the applicable lender has commenced enforcement of security granted in respect of that loan. (10) Realised credit losses where recovery was less than invested capital. (11) MREIF invests indirectly (via its investments in Metrics CRE Multi-Strategy Debt Trust that in turn invests in the MCP Real Estate Debt Fund (Master Trust)) which engages in direct lending activities. Figures (other than NAV) are based on underlying Wholesale Fund activities. (20) Leverage Ratio (Net Debt/EBITDA) applies to Corporate loans based on most recent certificate provided by the applicable borrower setting out compliance with financial covenants, Loan to Value Ratio (LTV) applies to loans backed by CRE and are calculated based on an independent valuation using either an 'on completion' market value for assets under construction or an 'as-is' value for assets not under construction. For certain CRE loans which are providing funding for only a limited scope of the development programme, known as "Early Works", Metrics measures the LTV on these loans based on the 'as-is' valuation plus construction costs expended as verified by an independent certifier. (21) Calculated as the interest amount overdue divided by AUM. (22) Represents loans in respect of which the lender has completed a restructuring by way of enforcement or agreement with the existing equity owners which resulted in the applicable lender's exit from the loan asset.

Abbreviations: AUD = Australian Dollar; AUM = Assets Under Management; BPS = Basis Points; Corp = Corporate; CRE = Commercial Real Estate; Ex = Excluding; Incl = Included; LTV = Loan to Value; M&A = Mergers & Acquisitions; NAV = Net Asset Value; Sub = Subordinated; WA = Weighted Average; Avg = Average; Metrics = Metrics Credit Partners Pty Ltd; NR = Not Rated; RBA = Reserve Bank of Australia; YTD = Year To Date.

MCP Real Estate Debt Fund

The MCP Real Estate Debt Fund (REDF) is an unregistered open-ended unit trust that invests in a portfolio of Australian Commercial Real Estate (CRE) loans. REDF offers investors direct exposure to Australia's bank dominated CRE loan market by lending to Australian CRE borrowers and projects including office, retail, industrial, residential development and specialised real estate assets (hotels, healthcare, etc). Net income is distributed monthly¹. REDF seeks to deliver the minimum hurdle return of the benchmark (Bank Bills/BBSW 90 days) plus credit margin (+500 bps p.a. net)² while adhering to fund parameters. REDF has an Issuer Rating of A- from S&P. Inception of the Fund was October 2017.

(1) The payment of monthly cash income is a goal of the Trust only and neither the Manager nor the Trustee provide any representation or warranty (either express or implied) in relation to the payment of any income. (2) This is a target and may not be achieved. (3) Past performance is not a reliable indicator of future performance. (4) Returns (Net and Distribution Returns) are based on NAV unit price. Returns are annualised if over one year. Returns over 1 month are compounded monthly, inception October 2017. Returns are post all Investment Management Fees, expenses and GST. Returns do not incorporate fee rebates and as such actual individual investor returns will differ from fund returns. Returns may not reflect all transactional costs (such as buy/sell spreads). CYTD returns are not compounded.

MCP Real Estate Debt Fund

Investment Performance^{3,4,5}

The Fund returned 2.47% (net) over the quarter and 11.02% over the last twelve-months. The Fund has achieved a 1-yr net return spread of 7.19% p.a. and 6.84% p.a. since inception. The Fund has continued to outperform its hurdle return of the 3M BBSW plus 500 bps through the cycle², which it has done since inception.

Portfolio Composition⁶

The Fund has been consistently exposed to senior ranking instruments and has very limited exposure to subordinated debt. While credit quality is also very important, position in the capital structure is typically an important protection for lenders. Whilst the fund may invest in subordinated loans from time to time, the Fund is expected to maintain its senior ranking profile.

Sector Diversification⁶

The Master Trust's loan portfolio is diversified principally by borrower, but also sponsor and geography. Metrics lends to large, high quality partners and strategically targets residential and industrial developments which are underpinned by strong demand from Australia's growing urban population and net migration, broad economic growth, logistics and the e-economy. Metrics has historically avoided significant exposures to commercial office, retail, student accommodation or other specialised assets where market depth or alternative use of the asset might be weak. Almost all Metrics lending is in metropolitan areas.

(2) This is a target and may not be achieved. (3) Past performance is not a reliable indicator of future performance. (4) Returns (Net and Distribution Returns) are based on NAV unit price. Returns are annualised if over one year. Returns over 1 month are compounded monthly, inception October 2017. Returns are post all Investment Management Fees, expenses and GST. Returns do not incorporate fee rebates and as such actual individual investor returns will differ from fund returns. Returns may not reflect all transactional costs (such as buy/sell spreads). CYTD returns are not compounded. (5) As at 31 March 2026 the RBA Cash Rate was 410 bps p.a. (6) Exposures measured as a % of AUM, where AUM includes loan commitments and other investments such as cash and committed capital available for investment. (7) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing at or above expectation, with no concerns identified, 2 - Loans performing but below expectations against the Metrics Base Case, 3 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report. (8) Represents loans in respect of which the applicable lender has commenced enforcement of security granted in respect of that loan. (9) Realised credit losses where recovery was less than invested capital.

(6) Exposures measured as a % of AUM, where AUM includes loan commitments and other investments such as cash and committed capital available for investment. (10) Rated by Metrics including where not rated by public rating agencies, weighted average credit quality includes debt investments only. (11) Cash represents capital available for new investment. (12) Weighted average to final maturity on loan investments. (13) An interest rate that moves up and down with a market benchmark or index. (14) A payment-in-kind (PIK) loan allows the borrower to accrue (or roll up) interest expense into the balance of the loan for a period rather than paying cash to the lender. Does not include project finance loans with interest capitalisation sub-limits budgeted within facility limit. This data is first reported from the December 2025 quarter. (15) MSCI and Standard & Poor's Global Industry Classification Standard (Sector level used, except for Real Estate which is shown at the Industry level to provide a more detailed breakdown of the Real Estate Sector). (16) Real Estate Management and Development typically includes investments where the counterpart is undertaking a property development including certain pre and post-construction activities.

(6) Exposures measured as a % of AUM, where AUM includes loan commitments and other investments such as cash and committed capital available for investment. (10) Rated by Metrics including where not rated by public rating agencies, weighted average credit quality includes debt investments only. (11) Cash represents capital available for new investment. (17) Carrying value as a % of par value or invested capital, expressed as a % of the loan portfolio. This breakdown includes loans held on a mark-to-market basis and loans held on an amortised cost basis and tested for impairment depending on the fund's valuation policy. (18) Leverage Ratio (Net Debt/EBITDA) applies to Corporate loans based on most recent certificate provided by the applicable borrower setting out compliance with financial covenants, Loan to Value Ratio (LTV) applies to loans backed by CRE and are calculated based on an independent valuation using either an 'on completion' market value for assets under construction or an 'as-is' value for assets not under construction. For certain CRE loans which are providing funding for only a limited scope of the development programme, known as "Early Works", Metrics measures the LTV on these loans based on the 'as-is' valuation plus construction costs expended as verified by an independent certifier.

(7) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing at or above expectation, with no concerns identified, 2 - Loans performing but below expectations against the Metrics Base Case, 3 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report. (8) Represents loans in respect of which the applicable lender has commenced enforcement of security granted in respect of that loan. (9) Realised credit losses where recovery was less than invested capital. (19) Calculated as the interest amount overdue divided by AUM. (20) Represents loans in respect of which the lender has completed a restructuring by way of enforcement or agreement with the existing equity owners which resulted in the applicable lender's exit from the loan asset.

Abbreviations: AUD = Australian Dollar; AUM = Assets Under Management; BPS = Basis Points; Corp = Corporate; CRE = Commercial Real Estate; CYTD = Calendar Year To Date; Ex = Excluding; Incl = Included; LTV = Loan to Value; M&A = Mergers & Acquisitions; NAV = Net Asset Value; Sub = Subordinated; WA = Weighted Average; Avg = Average; Metrics = Metrics Credit Partners Pty Ltd; NR = Not Rated; RBA = Reserve Bank of Australia.

Metrics Real Estate Income Fund

About Metrics Credit Partners

Metrics Credit Partners Pty Ltd (ACN 150 646 996; AFSL 416 146) (Metrics) is an alternative asset manager with expertise in fixed income, private credit, equity and capital markets and forms part of the Metrics Credit Holdings Pty Ltd (ACN 150 647 091) group, which collectively manages assets in excess of A\$37 billion.

Through our managed funds we provide unrivalled access to the highly attractive Australian private debt market to investors ranging from individuals to global institutions.

We offer tailored borrowing solutions to corporate and other entities of all sizes and across all industries in Australia, New Zealand and developed Asia.

We launched our first wholesale fund in 2013 and we are the manager of a number of wholesale investment trusts in addition to the Metrics Master Income Trust (ASX:MXT), which listed on the ASX in October 2017, Metrics Income Opportunities Trust (ASX:MOT) which listed on the ASX in April 2019 and the Metrics Real Estate Multi-Strategy Fund (ASX:MRE) which successfully listed on the ASX in October 2024.

We have established a range of innovative investment products that are designed to provide investors with access to investment opportunities that seek to provide capital stability and regular income.

Metrics' experienced investment team comprises the four founding partners and is supported by a team of highly qualified investment professionals with skills and experience covering origination, credit and financial analysis, portfolio risk management, legal and fund administration.

While the Report seeks to provide detailed information in respect of MREIF's and the Master Trust's investment portfolios, it is important to note that investments in corporate loans are private and confidential transactions between the borrower and the Master Trust, accordingly the Report does not identify individual investments.

All assets held by the Master Trust are valued each business day and that any movement in the carrying value of those assets (including any impairment) is reflected in the daily net asset value (NAV) of the Master Trust and as a result in MREIF's NAV which is published daily at www.metrics.com.au/mreif. An international accounting and professional services firm has been engaged to review the valuation of the underlying loan assets held by the Master Trust on a monthly basis and to ensure that the carrying values of those assets are adjusted if there is evidence that indicates that an asset is impaired or overvalued. MREIF's NAV is separately audited/reviewed by the Fund's independent auditors at each reporting date.

Disclaimer

Equity Trustees Limited (Equity Trustees) ABN 46 004 031 298 | AFSL 240975, is the Responsible Entity for the Metrics Real Estate Income Fund ARSN 671 699 228 (the Fund).
