

**During a challenging time after the birth of her first son, our creator, El, found solace in creative hobbies. After spending many weeks in the NICU and critical care wards at Alder Hey Children's Hospital over 6 months, El re-discovered her passion for interiors and design and found it to be a source of relaxation and distraction. This led to the creation of Moth Home Design.**

Moth Home Design is a lifestyle brand, offering sustainable luxury home fragrances, gifts, wall art, illustrations, and home decor.

Each piece is carefully curated to blend elegance with eco-consciousness, ensuring any space not only looks beautiful but is also value aligned.

Our commitment to sustainability extends beyond our products to our packaging and business practice; reflecting a holistic approach to creating a positive impact on the planet. We use recycled or fully recyclable materials, and source the highest quality and responsibly sourced ingredients for our products.

The collection features a range of meticulously crafted items, from hand-poured candles, wax melts and air fresheners infused with our unique fragrance blends, home decor pieces, and wall art that add a touch of sophistication to any space.

Our home fragrances are made with soy wax, which is a natural plant based alternative to traditional paraffin and mineral based waxes, offering a cleaner and 50% longer burn, so you can enjoy our products for longer. We only use the highest quality 100% pure essential oils and luxury fragrance oils to blend our own unique fragrance blends, to create the perfect ambience for your home.

Whether you are looking to refresh your home or find the perfect gift, Moth Home Design offers timeless pieces that elevate everyday living.

**With lots of exciting new products launching soon, Moth Home Design will be appearing at many pop up events in the run up to Christmas, and will also be in John Lewis in Liverpool from the 16th of December, where you can shop our products in person.**
