

Coronary CTA with Heartflow

Ordering Requirements

Orders must be physician-signed and placed for CT Angiography Heart + FFR + Plaque Analysis. Please include the patient's most recent H&P with blood pressure, heart rate, and BMI. Pacemaker status is required, including whether the patient is pacemaker dependent and device manufacturer/company.

Order three 100 mg tablets of Metoprolol Tartrate (Lopressor) for heart rate control. Any medications that may interfere with Lopressor should be reviewed with the ordering physician.

Patient Preparation

Patients should avoid ED medications (Cialis, Viagra, etc.) for 72 hours prior to the exam. No caffeine, nicotine, or alcohol within 12 hours of the appointment, and no food within 4 hours. Water is permitted prior to the exam.

This exam is performed exclusively at Iowa Radiology – Waukee: 2515 Grand Prairie Parkway, Suite 140 (UnityPoint Building, 1st floor, right side)
