

Men in Black **Pest Control Services**

Pest Solutions will be servicing your _____ for pest control on _____,
between _____ o'clock.

TO RECEIVE THE MAXIMUM BENEFITS FROM OUR SERVICE, PLEASE FOLLOW THE INSTRUCTIONS
BELOW:

1. KITCHEN: Take kitchen items out of the kitchen. Remove all dishes, pots, pans, and food from upper and lower cabinets including pantry. Stack on any table and cover with a sheet. Do not place anything on the sink, stove, counter top, or kitchen floor. Remove all loose paper. Adhesive paper okay to leave on. AFTER SPRAYING, you may wash counter tops, stovetops and breadboards only. Leave the cabinets alone: chemical will still work in cracks and will not harm dishes/food.
2. KITCHEN DRAWERS: Remove all drawers from cabinets & empty the drawers. Place drawers against kitchen wall. NOTE: insects like to hide in drawers so it is better to have drawers empty.
3. BEDROOMS/CLOSET: Remove all items from closet floors. Hanging clothes can be pulled to center of rack. However, if closet is infested all contents must be removed.
4. BATHROOMS: Remove everything from bathroom/medicine cabinets drawers and counters. Please do not forget to remove everything from under the sink.
5. FURNITURE: Move all furniture out from wall 2-3 feet. We must treat cracks and baseboards.
6. ANIMALS, BIRDS, FISH & REPTILES: Remove all animals, bird, fish, snakes, and reptiles. If the fish tank is too heavy to move, place wet towels over tank, disconnect the air pump and wrap the air pump in plastic. You are cautioned to check with your fish dealer, as some breeds may suffer from 4-6 hours without aeration. All birds, reptiles, and exotic animals may return after 24 hours.
7. KEYS: Make sure you have your keys! We lock all doors when we leave.

8. TIME TO STAY OUT: Healthy adults 3-4 hours, Elderly adults 4-6 hours and check with your doctor, children over two years old 6-8 hours, anyone with respiratory allergy/asthma 6-8 hours, and children and infants 6-8 hours. Labels & MSDS will be provided upon request.

***NOTE: When you come home, make sure the chemical is COMPLETELY DRY before you put items back in cabinets, closets and drawers. DO NOT WASH CABINETS. Washing cabinets destroys the effectiveness of the chemical. You may experience more roaches after treatment.

***Being only partially ready will not solve your roach problem. So please be prepared!!!
