

Amino On A Page

1. Overview:

Amino has been blazing a trail in media technology for decades.

2. Legacy

In 1997, the UK-based company launched the very first IPTV solutions - mostly for Pay TV Operators; this helped kick off what has become the global streaming revolution.

3. Expertise

Thanks to this legacy experience in Pay TV, Amino brings unique expertise in terms of security, support and the ability to scale - big time!

4. Focus

Today, Amino focuses on digital signage and enterprise video: powering screens in hotels, hospitals, stadiums, shops and thousands of venues, globally.

5. H200

The versatile H200 media player delivers secure, high-performance playback designed for 24/7 reliability, combined with the lowest possible latency for live streaming. (Yes, one device does everything!)

6. H200W

For greater deployment flexibility and a wider range of enterprise use cases there's the H200W, a Wi-Fi enabled 4K UHD media player with BLE 5.2.

7. Orchestrate Cloud Platform

Used in conjunction with Amino's cloud platform, Orchestrate, organizations can commission, (and decommission!), manage and monitor thousands of screens remotely.

8. Conclusion

In short, Amino makes complex screen networks simple, reliable, and sustainable - ensuring every screen earns its keep.
