# Review Caretasks

Version 1.12

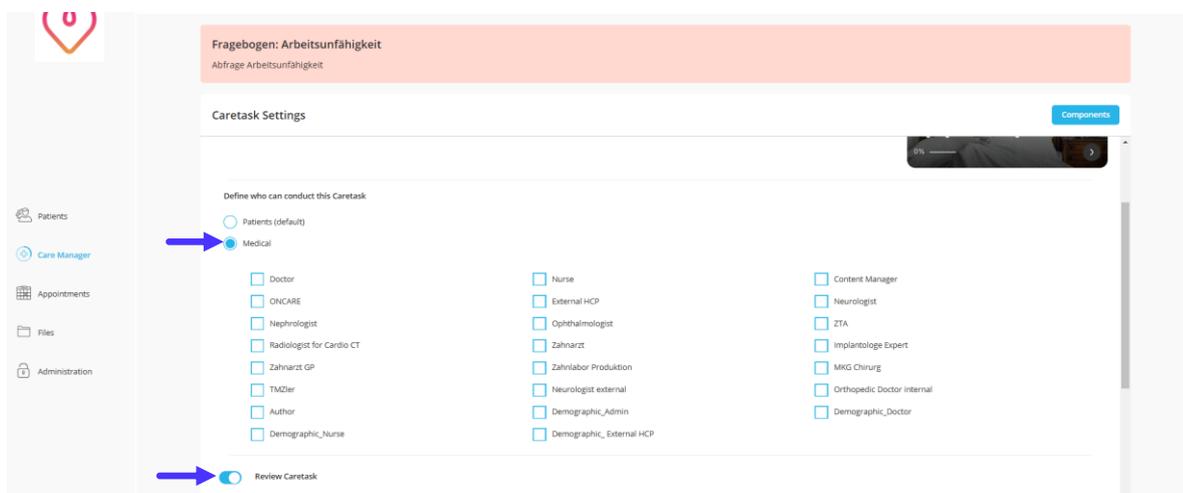

## Review Caretasks

Review Caretask are assessments for physicians (WebApp users) that are intended to make it easier for physicians to review reports for a specific Caretask. A Review Caretask is a sub-task to a certain Caretask which is only visible to the HCPs. The sole purpose is to facilitate the review of reports in a way that HCPs receive a special notification for the review.

This field becomes visible only when **"Medical"** is selected when conducting the Caretasks within the myoncare Careplan Manager. By selecting this field, it creates a sub-task to the actual Caretask, accessible to the HCP in a new tab within the Care Manager called 'Review Caretask'.

If a healthcare professional uses the option to select a default "Review Caretask" it will automatically generate the reports that are associated with it. These reports can be easily accessed by clicking on the **"Ready-to-Review Reports"** notification icon located at the top right of the screen.

These specific Review Caretasks cannot be manually assigned to patients, nor they can be chosen during the creation of a care pathway. Additionally, there is no possibility to scan a Review Caretask. However, these can be added and activated to any Caretask.

We make healthcare scalable.
