

Powering Digital Experiences in Hospitality

Project Overview

Hospitality operators need a reliable way to manage video and signage across guest rooms, lobbies, meeting spaces and dining areas. Most hotels rely on existing screens and limited IT resources so the solution must fit around current infrastructure. As guest expectations shift toward more responsive and branded experiences, Amino provides a platform that simplifies delivery, reduces pressure on staff and ensures performance and revenue generation opportunities on every screen.

Our Process

- 1 Deliver personalized content in rooms, lobbies and shared spaces from one centralized system.
- 2 Support existing displays and networks with zero-touch deployment and no need for external contractors.
- 3 Leverage central tools to manage devices, schedule changes and push content updates remotely.
- 4 Support content tailored to services, promotions and guest facing information.

Amino's Solution

Amino delivers a system that fits around how hotels already run and supports needs, helping teams do more with the screens they have.

H200 media players adapts to screen types and layouts for guest rooms and shared areas.

Orchestrate provides a central tool to monitor performance and apply changes when needed.

Long-term firmware support extends device life and minimizes replacement needs.

Key Benefits

Amino's platform helps hospitality teams simplify operations and capitalise on existing screens across more guest spaces.

1

Personalized for guest satisfaction at every stage of the service.

2

Improves ROI by keeping existing displays in use longer.

3

Flexible playback adapts messaging to guest types.

4

Minimal install impact, allowing rollout alongside daily operations.

5

Support evolving content needs without hardware changes.

6

Central tools ease staff load and fix issues faster.

Conclusion

Amino helps hospitality operators make their screens work harder without increasing operational pressure. On-site teams can tailor content across guest and shared spaces without relying on external contractors.
