LOGO MISUSE

It is important that the appearance of the Logo remains consistent. The Logo should not be misinterpreted, modified, or added to.

ENSURE YOU READ ALL RULES IN THE DOCUMENT INCLUDED IN THE LOGO PACKAGE.

Do not add a drop shadow to the logo

Do not bevel or emboss

Do not rotate the logo

Do not outline the logo

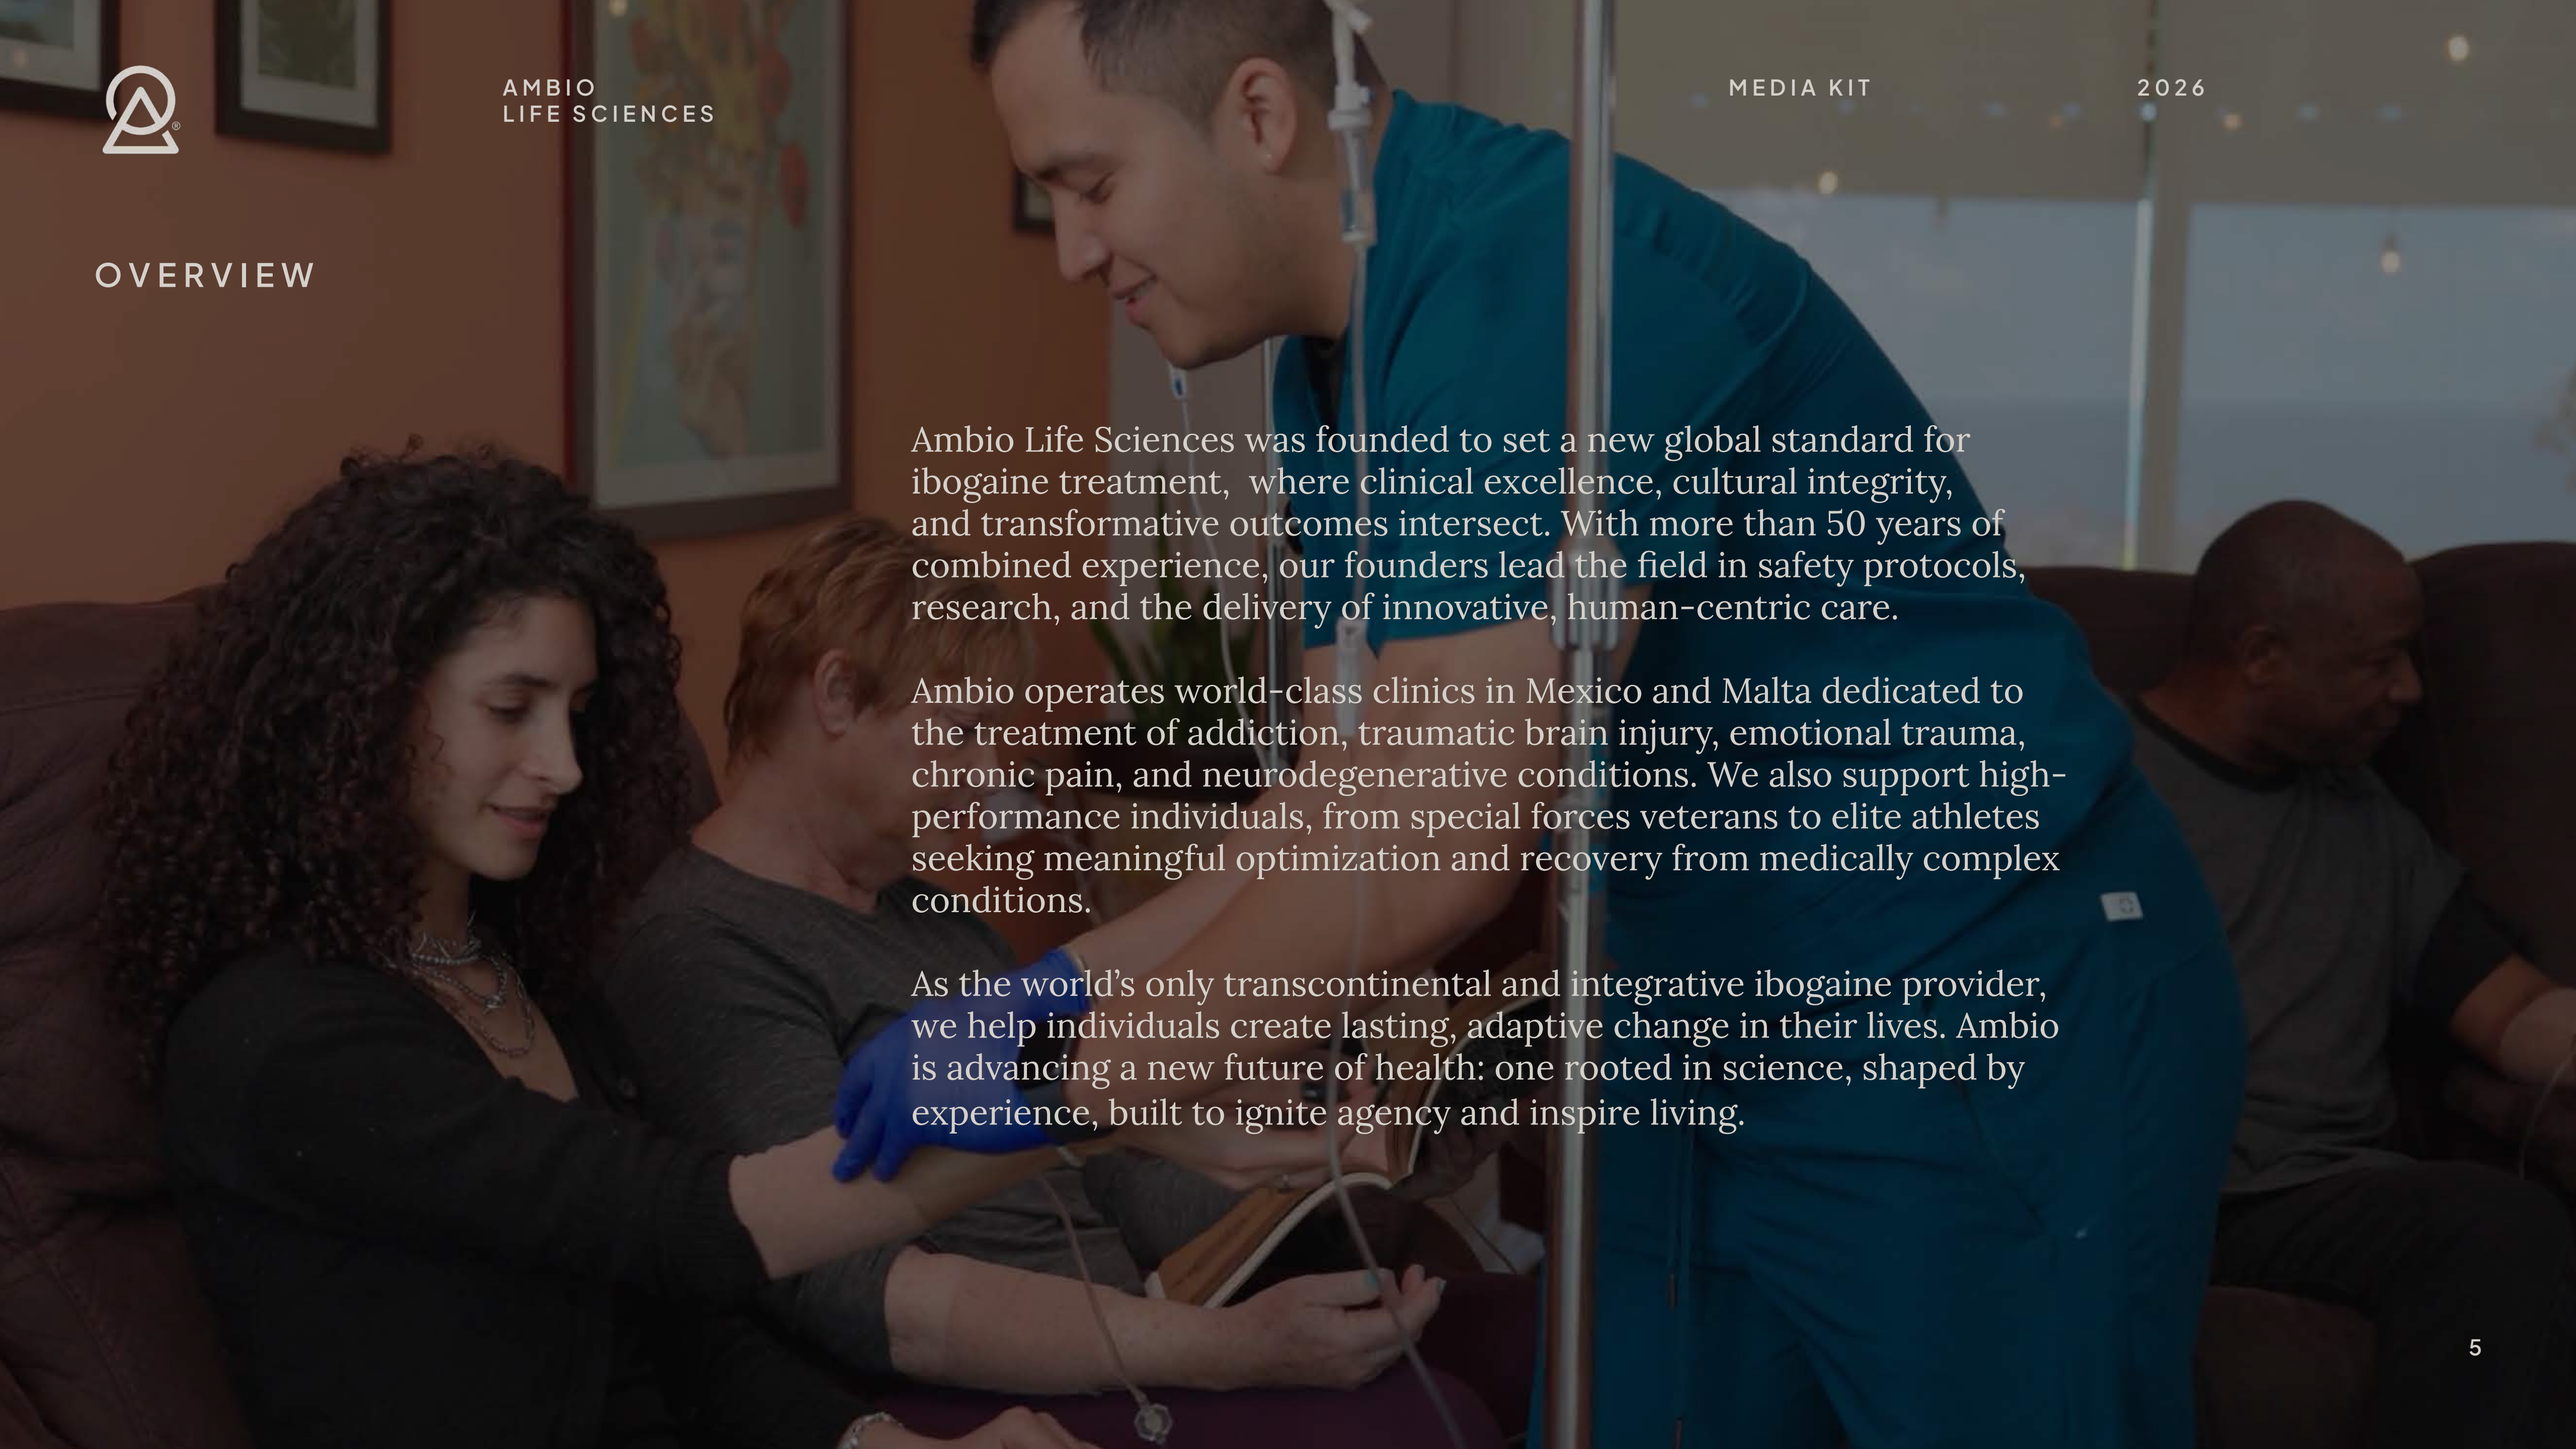

Do not use the logo over complex images, patterned backgrounds, or in areas where insufficient contrast reduces legibility.

Do not add gradient fill to the logo or colors not specified for the logo

OVERVIEW

Ambio Life Sciences was founded to set a new global standard for ibogaine treatment, where clinical excellence, cultural integrity, and transformative outcomes intersect. With more than 50 years of combined experience, our founders lead the field in safety protocols, research, and the delivery of innovative, human-centric care.

Ambio operates world-class clinics in Mexico and Malta dedicated to the treatment of addiction, traumatic brain injury, emotional trauma, chronic pain, and neurodegenerative conditions. We also support high-performance individuals, from special forces veterans to elite athletes seeking meaningful optimization and recovery from medically complex conditions.

As the world’s only transcontinental and integrative ibogaine provider, we help individuals create lasting, adaptive change in their lives. Ambio is advancing a new future of health: one rooted in science, shaped by experience, built to ignite agency and inspire living.

FOUNDERS' BIOS

JONATHAN DICKINSON

CEO
& CO-FOUNDER

One of the world's leading experts on ibogaine, Jonathan brings over 15 years of experience in clinical care, traditional practice, and psychedelic research to his leadership at Ambio. A Mexico-licensed psychologist and former Executive Director of the Global Ibogaine Therapy Alliance, he authored the field's foundational safety guidelines and has published widely on ibogaine's therapeutic, cultural, and ecological significance. He holds the only active export license for Tabernanthe iboga root, led the first Nagoya-compliant export from Gabon, and was initiated into the Dissoumba/Fang tradition of Bwiti in 2014 and the Missoko tradition in 2022. He has co-authored peer-reviewed research on ibogaine's potential for trauma, TBI, pain, MS, and Parkinson's. At Ambio, he leads strategy, research, and innovation – advancing a globally scalable model of care that bridges tradition, science, and integrity.

TREVOR MILLAR

CHIEF OPERATIONS OFFICER
& CO-FOUNDER

A social entrepreneur and pioneer in ibogaine advocacy and treatment, Trevor brings over a decade of experience supporting individuals through addiction recovery, trauma healing, and post-treatment integration. His background includes co-founding the Canadian Psychedelic Association and serving as Chair of the Board for MAPS Canada. He has co-authored peer-reviewed research on ibogaine's applications for trauma, TBI, and opioid use disorder, and has been featured in award-winning documentaries including DOSED and In Waves and War. Grounded in personal experience and guided by a philosophical approach to healing, Trevor is helping shape a new model for ethical, integrative psychedelic care on a global scale. At Ambio, Trevor leads operations, strategic partnerships, and client experience – bridging clinical care with systems design, education, and public advocacy.

MEET THE REST OF THE AMBIO TEAM

JOSÉ INZUNZA

CHIEF MEDICAL OFFICER
& CO-FOUNDER

A pioneer in ibogaine treatment safety, José brings over 15 years of frontline emergency medical experience to his leadership at Ambio. His background as a firefighter and paramedic, along with his service in the Mexican Red Cross, informs his rigorous approach to risk mitigation, clinical preparedness, and medical ethics. He is a certified instructor with both the American Heart Association and the National Association of Emergency Medical Technicians, and has trained emergency professionals across Latin America. José has co-authored groundbreaking research on ibogaine applications for trauma, pain, and TBI, and his work integrates Western clinical protocols with a human-centered approach to care. At Ambio, he leads protocol development, clinical training, and safety innovation – advancing a gold standard of ibogaine care rooted in ethics and medical rigor.

OUR PROGRAMS

FOUNDATIONAL PROGRAM

Our Foundational Program provides a neurological, psychological, and spiritual foundation to anchor difficult change. Designed for those seeking meaningful, lasting course correction in their lives, the Foundational Program provides a safe, structured container for transformation – a turning point that offers clarity, healing, and the momentum you've been seeking to move forward. Supporting people navigating trauma, depression, grief, illness, or those simply feeling misaligned in life, this program is ideal for a wide range of people seeking meaningful improvements in their lives. Ambio has earned a reputation as a trusted ibogaine provider for a wide range of guests, including military veterans, first responders, women's groups, athletes, artists, and high-profile individuals.

DETOXIFICATION PROGRAM

Our Detoxification Program is designed for people who want to stop using substances, but struggle with the barriers of withdrawal and cravings. Whether a person is struggling with opioids, stimulants, alcohol, kratom, or prescription medications, our Detoxification Program offers a powerful reset – interrupting destructive patterns and returning something many have lost: the ability to choose. Unlike most detox and maintenance models, Ambio's program is designed to interrupt destructive patterns without chaining you to new ones. While detox from most substances can be long, painful, and unpredictable, ibogaine is the only known medicine with mounting clinical evidence showing it can quickly mitigate most difficult symptoms of withdrawal.

NEUROREGENERATIVE PROGRAM

Our Neuroregenerative Program was designed for people living with conditions like Parkinson's, multiple sclerosis (MS), essential tremors, and other neurodegenerative conditions who wish to explore the use of ibogaine for these conditions. Using optimized loading doses followed by extended microdosing, **the protocol targets regeneration and an improved quality of life in the long term – backed by emerging data, ongoing research, and human-centric care.** This treatment uses an optimized 'loading dose' of ibogaine, ideal for people with physical challenges or age-related concerns, as a precursor to extended microdosing. Treatment occurs in accessible facilities, with continuous medical supervision and supportive physiotherapy designed to honor the complexity of chronic illness.

MILESTONES

2008

José is first exposed to ibogaine while working as an EMT in Mexico.

2009

Jonathan begins clinical work in ibogaine treatment in Mexico.

2011

José begins formal ibogaine treatments and develops early safety protocols.

2012

Trevor launches Liberty Root Therapy to provide legal ibogaine treatment in Canada.

Jonathan becomes Executive Director of the Global Ibogaine Therapy Alliance (GITA).

2014

Jonathan receives Dissoumba/Fang Bwiti initiation in Gabon.

2015

Jonathan publishes Clinical Guidelines for Ibogaine-Assisted Detoxification.

José develops screening and treatment methodologies to reduce mortality rates in ibogaine clinics.

MILESTONES

2018

José founds Nouvelle Vie clinic in Mexico, a precursor to Ambio Life Sciences.

2019

Trevor co-founds the Canadian Psychedelic Association.

2021

Ambio Life Sciences is founded by Trevor, Jonathan, and José and expands to new clinic locations throughout Baja California.

2022

Jonathan secures the world's first legal ibogaine export license under the Nagoya Protocol.

Jonathan receives Missoko Bwiti initiation in Gabon.

2023

Ambio becomes the first and only Nagoya-compliant ibogaine clinic in the world.

Filed the first Nagoya-compliant patents for Ambio's unique safety protocol, the use of ibogaine to treat MS, and its use in post-stroke recovery.

MILESTONES

2024

Ambio founders co-author groundbreaking Nature Medicine publication with Stanford University on ibogaine for veteran traumatic brain injury.

2025

Ambio co-authors case report in Frontiers showing unprecedented lesion reduction in ibogaine patients with multiple sclerosis.

Ambio launches world’s first Neuroregenerative Program for patients with Parkinson’s, MS, and other conditions.

Ambio is featured in a Netflix documentary, In Waves & War.

2026

Ambio becomes the world’s first transcontinental ibogaine clinic with a European expansion + the opening of its Malta clinic.

FAQS

What is ibogaine?

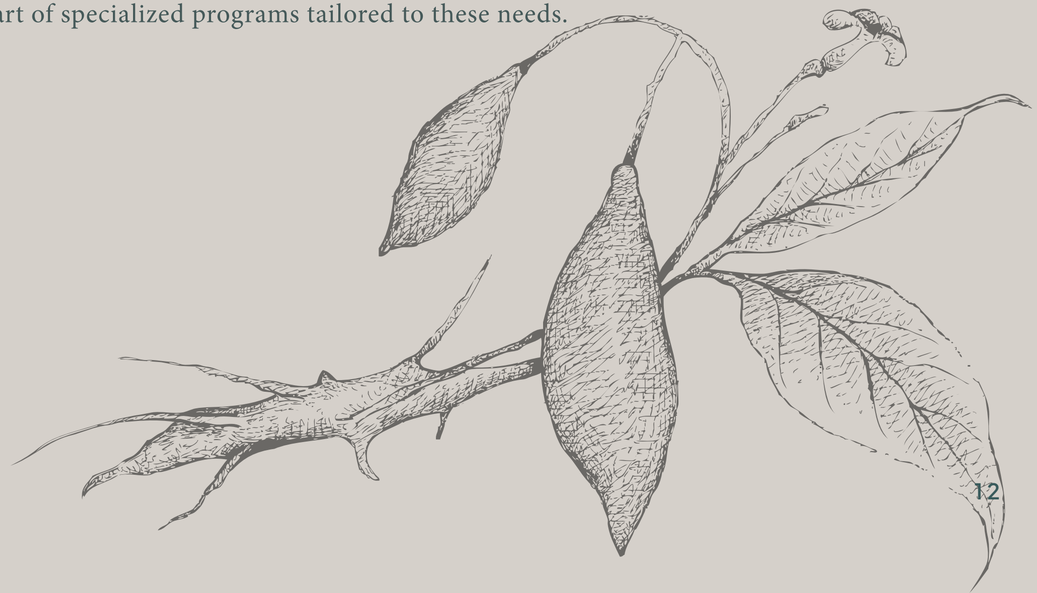

Ibogaine is a plant-derived medicinal alkaloid with powerful psychoactive and neuroregenerative effects. It's traditionally used in Central Africa for healing and initiation, and today, it's used clinically to interrupt addiction, improve neurological function, and support deep personal transformation.

How does ibogaine work in the body?

Ibogaine is believed to engage multiple systems at once, including serotonin, dopamine, opioid receptors, NMDA receptors, and more. It also appears to trigger neuroplasticity and increase neurotrophic factors like BDNF and GDNF, which support healing, mood regulation, and functional recovery. It is one of the most pharmacologically complex medicines on earth.

What conditions can ibogaine help treat?

Ibogaine has been most studied for addiction, but shows promising effects in treating mental health issues, neuropathic pain, traumatic brain injury (TBI), Parkinson's disease, and multiple sclerosis, among others. At Ambio, we deliver ibogaine as part of specialized programs tailored to these needs.

FAQS

Where does ibogaine come from?

Ibogaine is primarily derived from the root bark of Tabernanthe iboga, a rainforest shrub native to Central and West Africa. For clinical use, it's typically extracted from other ibogaine-rich plants to ensure sustainability. Ambio is committed to ethical sourcing and works in partnership with communities in West-Central Africa.

Is there scientific research behind ibogaine?

Yes. While research is still emerging, peer-reviewed studies and case reports show ibogaine's impact on addiction, neurological function, and mood regulation. Ambio has contributed to research published in Nature Medicine and Frontiers in Immunology, including a seminal 2024 Stanford-collaborated study that showed unprecedented neuroregeneration in 30 Navy SEAL veterans with TBI, following one ibogaine treatment at Ambio Life Sciences.

What is the ibogaine experience like at Ambio?

The experience is deeply internal and varies from person to person. Most describe it as a dreamlike, introspective journey where memories, emotions, and insights emerge. Patients are supported by our staff at every moment and monitored for safety in a calming, clinical setting.

FAQS

How is the treatment process structured?

Treatment begins with comprehensive pre-screening, including medical review, lab work, and an EKG. Once admitted, patients receive their ibogaine flood dose in a medically monitored session lasting 12–24 hours. Each treatment is tailored to the patient's physiology and history, and supported by an experienced team in a secure, therapeutic environment.

What safety protocols are in place?

Safety is our top priority. Every treatment includes:

- Cardiac and vitals monitoring during ibogaine treatment
- Detailed medical screening for suitability
- On-site medical teams trained in emergency response
- Clinical-grade treatment rooms outfitted like cardiac ICUs
- Individualized dosing and magnesium supplementation
- Full post-treatment observation and recovery

Why do you treat with ibogaine in Mexico and Malta?

Ibogaine is not legal in the United States, where ibogaine remains a Schedule I substance. In Mexico and Malta, ibogaine is unscheduled and can be administered safely and legally under medical supervision.

SOCIAL MEDIA

TESTIMONIALS

01

"I came to the clinic to seek healing from the PTSD and injuries I've suffered from due to the war in Afghanistan. My overall experience was incredible and the results were nothing short of miraculous. Today I feel like 90% of my PTSD has gone away and my wife and kids have noticed it. I'm not as angry and I'm a lot more pleasant of a husband and father to be around. Ambio is the most effective program for healing mental trauma in my opinion."

BRIAN F.

02

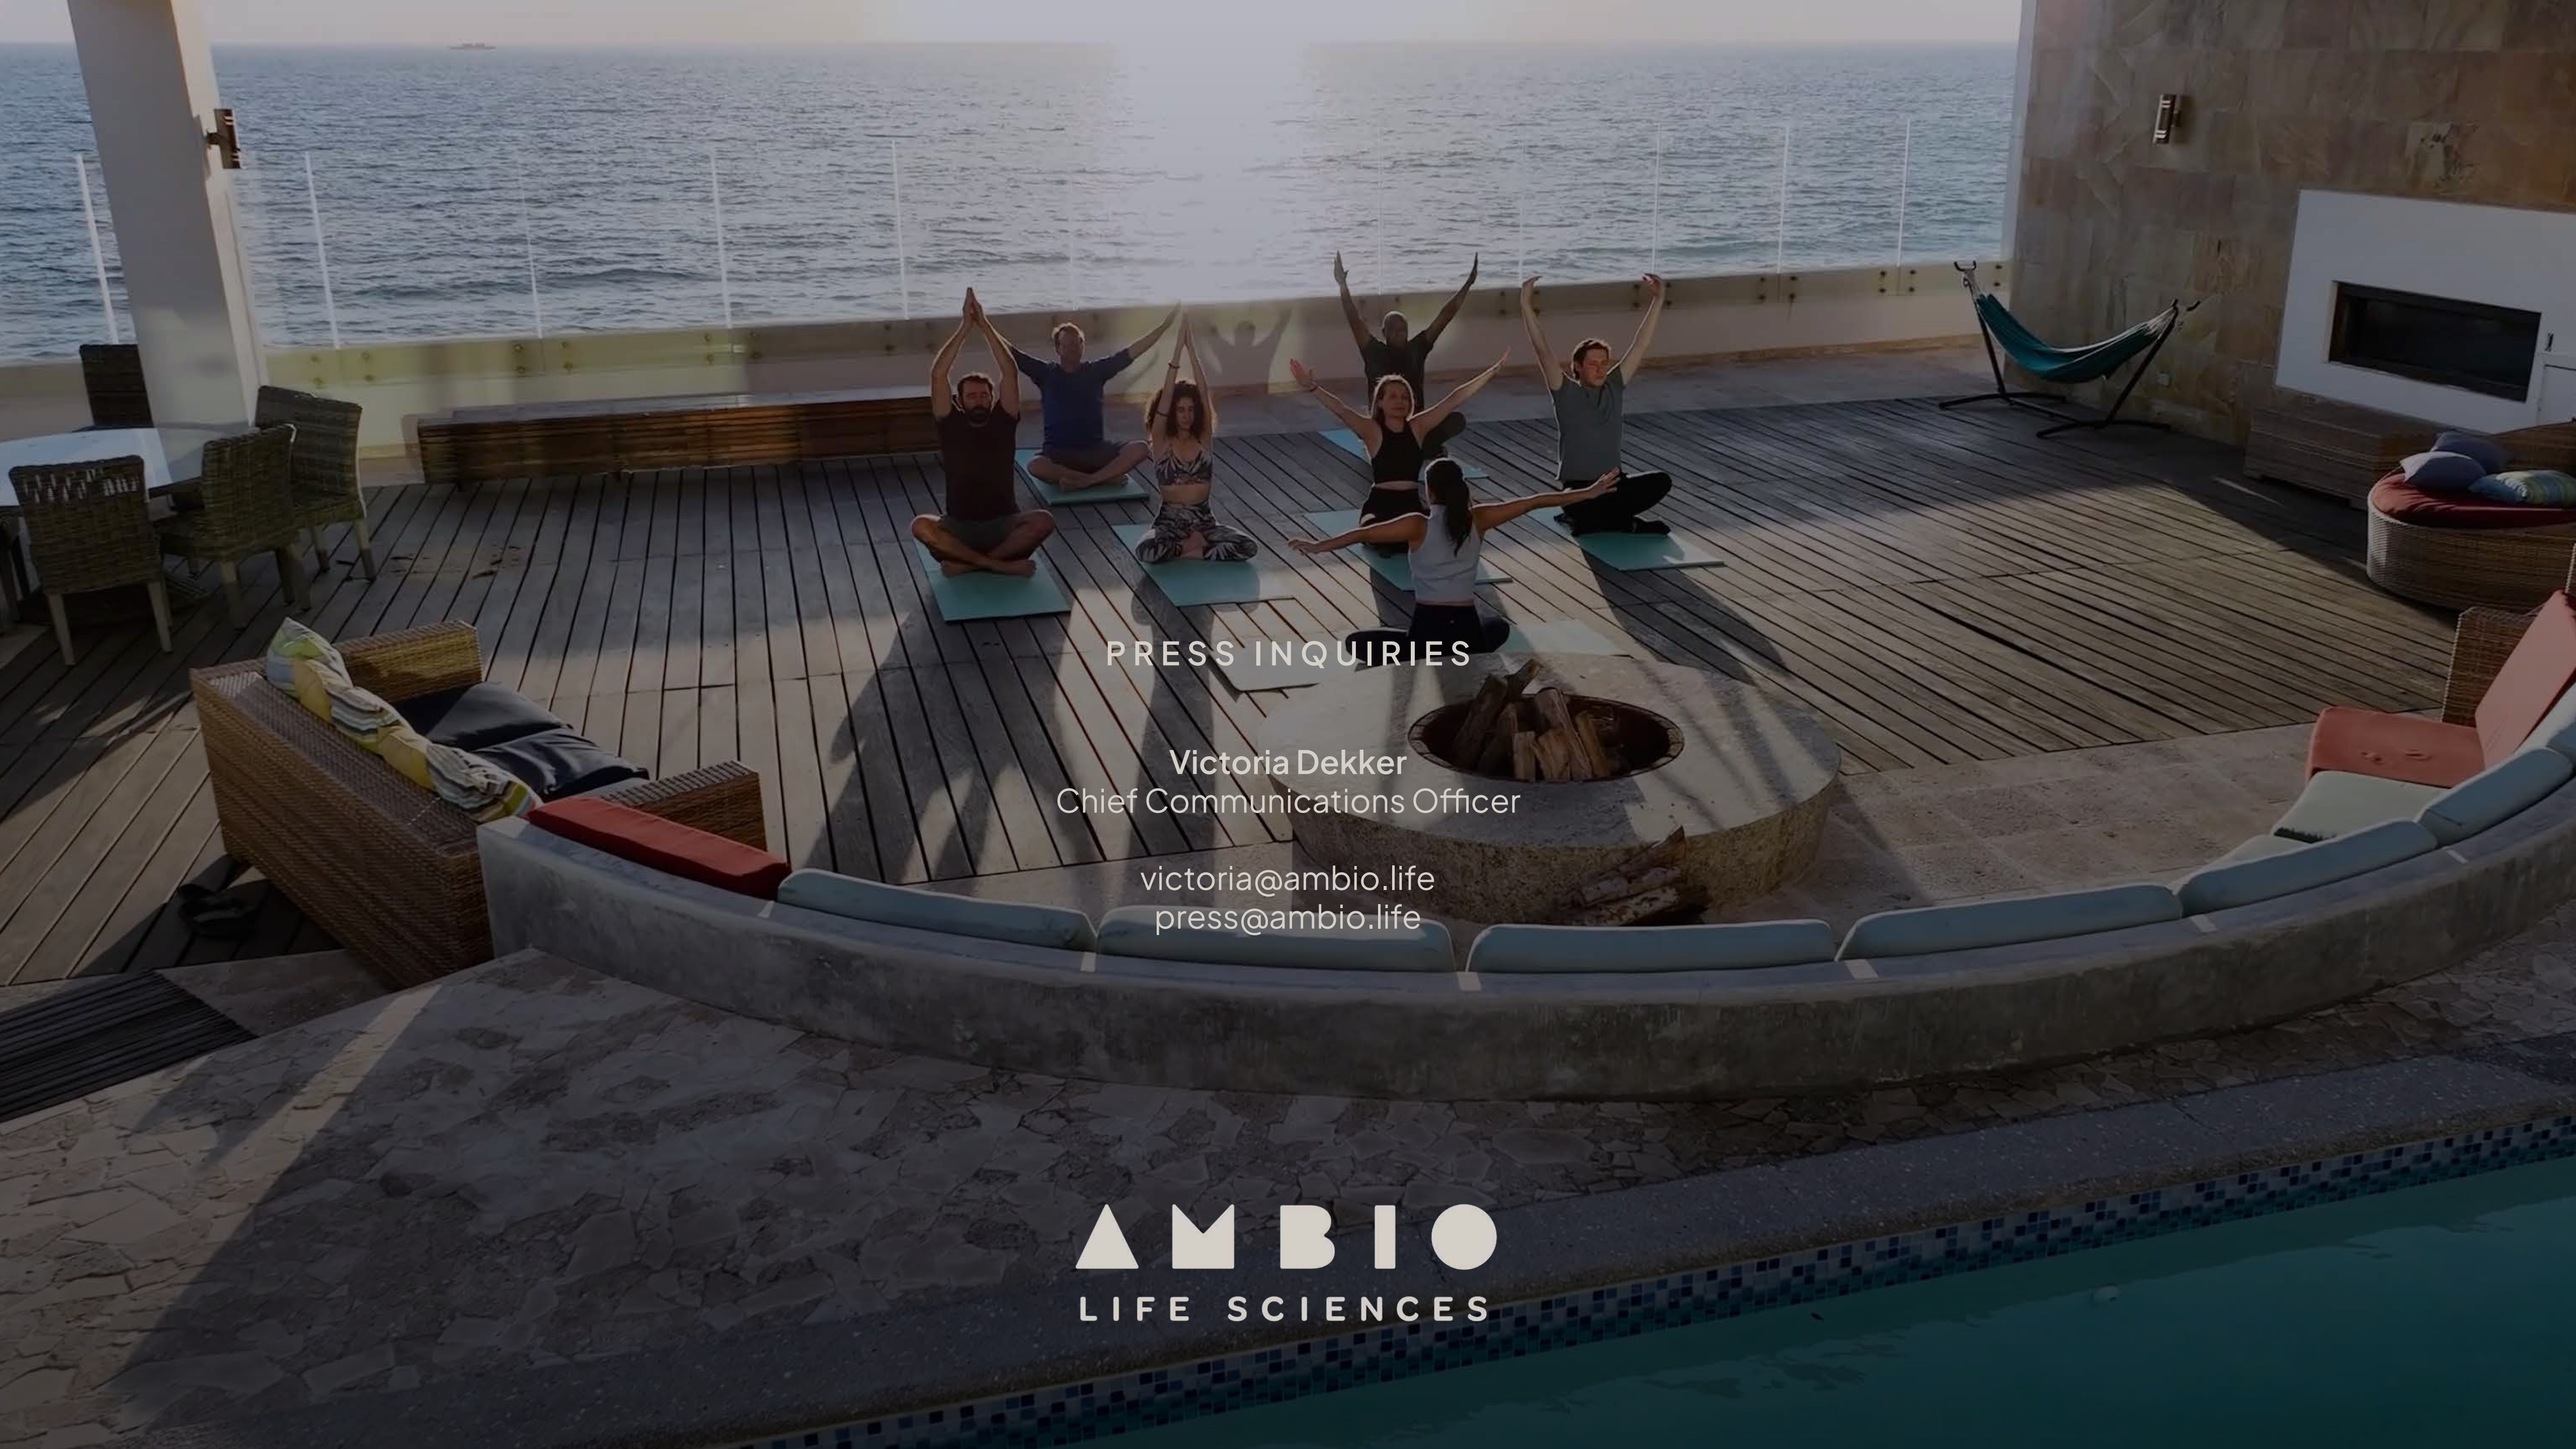

"I was hoping to find some relief and healing from PTSD caused by 40 years of domestic abuse. My life was full of fake smiles as I tried to survive the daily war in my head that was killing my soul. At Ambio, there was a feeling of pure acceptance, no judgment, lots and lots of love from all the staff and the other women who were there with me. Today and everyday since I left the clinic, I have a real smile on my face and I'm no longer living in survival mode. I would recommend Ambio to anyone who thinks there is no hope of finding healing or ever finding yourself again."

GINA D.

03

"I'd lost almost all hope after 20 years of non-stop chronic pain. My life and pain experience have dramatically improved since going through the program, to a point that, quite frankly, is surreal. I can't speak highly enough of Ambio, every person there made my experience better than I'd ever hoped. Ambio is a one of a kind safe haven of expertise wellness and healing."
