Uproot Security

PLATFORM OVERVIEW

SECURITY-FIRST COMPLIANCE

The security platform that happens to handle compliance.

Continuous monitoring, autonomous pentesting, and signed evidence — so the audit is a byproduct, not a project.

PREPARED FOR

PREPARED BY

Mariann George-Partnerships Associate

DATE

13 July 2026

SOC 2 · ISO 27001 · HIPAA

WHY NOW

Compliance was built for auditors. Your security wasn't.

STATUS QUO

Screenshots & spreadsheets

- ✕ Evidence is a screenshot taken once a year — stale the moment it's filed.
- ✕ GRC tools speak policy, not infrastructure. Engineers translate by hand.
- ✕ Audit prep eats an engineering quarter, and proves nothing about real risk.

WITH UPROOT

Proof from the source

- ✓ Evidence pulled from systems of record, signed and timestamped — fresh to the minute.
- ✓ Controls map to your cloud, identity, and code. Drift becomes a finding in minutes.
- ✓ Get secure first. The clean report at year-end follows on its own.

PRODUCT OVERVIEW

One posture engine. Every product reads the same source of truth.

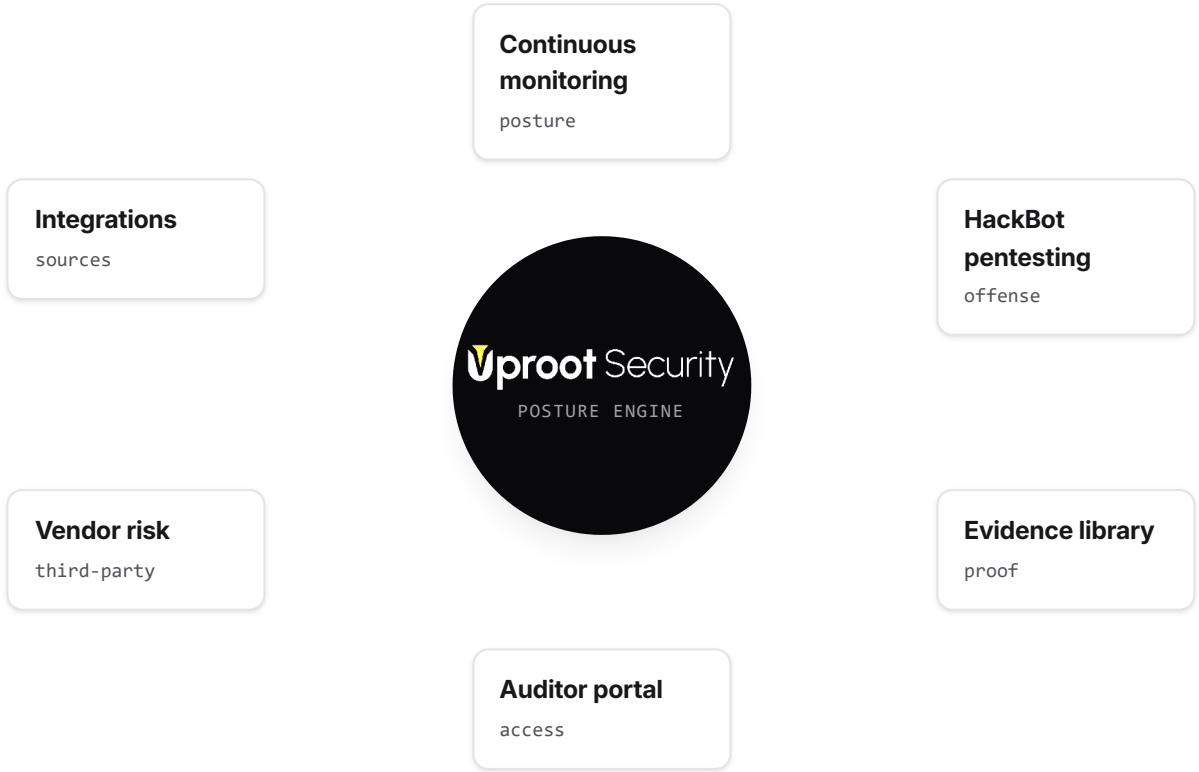
Uproot connects to the systems you already run, builds a live model of your security posture, and drives every workflow from it.

Monitoring, evidence, pentesting, vendor risk, and the auditor portal aren't separate tools bolted together — they're views over one continuously-updated truth. Fix something once and every framework, report, and dashboard reflects it instantly.

140+
deep integrations across your stack

22
frameworks as first-class objects

5 min
from `uproot init` to live posture



KEY CAPABILITIES

Six products. One platform engineers actually want to run.

Continuous monitoring

Live posture across cloud, identity, and code. Drift becomes a finding in minutes, not at the next audit.

- Re-checks every change, 24/7

Evidence library

Every control backed by evidence pulled from the source — signed, hashed, and timestamped. No screenshots.

- Freshness measured in minutes

HackBot pentesting AGENTIC

Autonomous pentests that re-run on every deploy. New routes become findings — with chained exploits verified.

- Runs continuously, not annually

Auditor portal

Read-only, scoped, revocable access for your auditor. Zero email attachments, zero shared drives.

- Scoped & revocable in one click

Vendor risk

Continuous third-party monitoring. Security questionnaires answered once, then reused forever.

- Answer once, reuse everywhere

Integrations

140+ deep, API-grade connectors across cloud, IdP, code, devices, and HR. Open-source, never OAuth-veneer.

- Open-source connector catalog

HOW WE COMPARE

A security platform, not a compliance checkbox.

Capability	Uproot Security security-first platform	Legacy GRC tools compliance-first	Manual / spreadsheets status quo
Continuous control monitoring cloud · identity · code	✓ Native	– Partial	✗ None
Evidence from systems of record signed · hashed · timestamped	✓ Native	– Partial	✗ None
Autonomous pentesting (HackBot) re-runs on every deploy	✓ Native	✗ None	✗ None
Scoped, revocable auditor portal no email attachments	✓ Native	– Partial	✗ None
Vendor & third-party risk questionnaires reused	✓ Native	– Partial	✗ None
Multi-framework crosswalk map once, satisfy many	✓ Native	– Partial	✗ None
140+ deep, API-grade integrations open-source connectors	✓ Native	– Partial	✗ None
Real-time drift → finding minutes, not annually	✓ Native	✗ None	✗ None

FRAMEWORKS COVERED

Every framework, mapped against one underlying truth.

Implement a control once — it satisfies SOC 2, ISO 27001, HIPAA, and the next framework your largest customer invents. New frameworks become an afternoon, not a project.

S2 AUDIT

SOC 2 Type I & II

The one enterprise buyers keep asking for

27 CERTIFICATION

ISO 27001:2022

International ISMS standard, required for EU sales

HI REGULATION

HIPAA

For anyone touching protected health data

GD PRIVACY

GDPR

Article 30 records, DPA tracking, breach playbook

PCI INDUSTRY

PCI DSS v4.0

Cardholder data handling, scoped or full

FR FEDERAL

FedRAMP Moderate

325 controls, mapped and monitored

CSF INDUSTRY

NIST CSF 2.0

Govern · Identify · Protect · Detect · Respond

42 AI

ISO 42001

AI management systems, the next ask

INTEGRATIONS

Deep integrations, not OAuth-veneer.

140+ first-party connectors reading the API your engineers actually use — evidence fresh to the minute across cloud, identity, code, devices, and HR.

CLOUD | IDENTITY | CODE | DEVICES | DATA | HR | OBSERVABILITY | SECRETS

AWS cloud	**GCP** cloud	**Azure** cloud	**Okta** idp	**Google Workspace** idp	**GitHub** code	**GitLab** code	**Linear** tickets
Jira tickets	**Slack** comms	**Datadog** obs	**Uproot Agent** native	**Kandji** mdm	**CrowdStrike** edr	**Snowflake** data	**Rippling** hris
1Password secrets	**Stripe** billing	**Terraform** iac	**Cloudflare** edge	**PagerDuty** oncall	**Notion** docs	**Vanta migrate** tool	**+120 more** connectors

FROM THE TEAMS RUNNING IT

What customers measure after they switch.

87%

Fewer engineering hours spent on audit prep, year over year

5d

Median time from first integration to provable readiness

$214k

Average reduction in real risk posture, audited at year one

When we evaluated our options for compliance and securing our systems, we found that UprootSecurity's compliance and security model aligned perfectly with our needs. It gave our team real-time visibility into the end-to-end process, saving our engineers hundreds of hours of manual effort.

HH **Hiren Hasmukh**
CEO · Teqtivity

When we evaluated our options for compliance and securing our systems, we found that UprootSecurity's compliance and security model aligned perfectly with our needs. It gave our team real-time visibility into the end-to-end process, saving our engineers hundreds of hours of manual effort.

YN **Yogesh Narayan**
Co-founder & CTO · Gallabox

Uproot PtaaS offers the perfect suite of features to ensure the highest security standards for our clients. We are impressed by their dedication to continuous testing. Their seamless integration combined with the hacker mindset and thorough manual pentesting approach, truly sets them apart.

GK **Gaurav Kulkarni**
CEO · AuditCue

NEXT STEP

Get secure. The audit will follow.

Connect your first system in five minutes. See your real posture by lunch. Schedule the auditor whenever you're ready — they'll have nothing to ask for.
