

# External Loss Event Data Feed

Use recent, detailed incidents from across the market to benchmark exposure, challenge scenarios and strengthen controls.

## Why external loss events matter

Internal events show what your firm has experienced. External events reveal failures and impacts that may also be relevant to your business - including risks you have not yet encountered.

01

### BENCHMARK

Compare incident types, severity and impacts with your internal experience.

02

### CHALLENGE

Use real events to test risk assessments and scenario assumptions.

03

### IMPROVE

Examine causes and controls to identify gaps and strengthen mitigation.

## A fuller view of risk

### RECENT & HISTORIC EVENTS

What happened, why, and with what impact.

### FORWARD-LOOKING SCANNING

What is changing in the risk landscape.

**Pooled loss data supports peer benchmarks. RiskSpotlight adds timely incident detail.**

Together with horizon scanning, it informs decisions and controls.

The Basel Committee encourages banks, where feasible, to gather external operational risk event data and use it in internal analysis. Source: BCBS, Sound Management of Operational Risk (2021), para 35.

## Detailed event data, ready for your workflow

The feed turns curated Portal events into structured records your team can analyse alongside internal loss data.

### Each record can include

#### EVENT & CONTEXT

Organisation, country, dates, status and event timeline

#### RISK & CAUSES

Related risks, Basel and RiskSpotlight categories, key causes

#### IMPACTS & CONTROLS

Financial, customer and disruption impacts; mitigating controls

#### ORGANISATION METRICS

Revenue, assets, headcount and customer data, where available

### How the feed reaches your analysis

#### HISTORICAL FILE

A starting dataset

#### WEEKLY FILES

New or updated events

#### EXCEL OR CSV

Agreed file structure

#### YOUR SYSTEMS

Import, model, report

#### DESIGNED FOR INTEGRATION

A column dictionary and three-level taxonomy support mapping to your own loss event categories. File scope, recipients and format are agreed during onboarding.

#### EXTERNAL LOSS EVENT DATA FEED

**£5,000** per year, in addition to a Portal subscription
