Patient Handout

Dear Client,

If you are prescribed medication from your physician who is treating you for injuries resulting from the claim we are representing you for, and you do not want to incur out of pocket costs up front, please have your physician send your prescription to Preferred Prescription Pharmacy.

We have arranged for them to provide you medications which will be paid at the time of settlement along with your other unpaid medical bills, and should there be no recovery on your legal claim, they will not seek payment from you.
