

Our History

Our story began more than 50 years ago with a family that revolved around a medical instrument manufacturing business. The foundations for this thriving business were laid by a team of highly ambitious and professional individuals who came from the field of manufacturing surgical and dental instruments. From there, the business sparked the interest of our founder and showed that when you have the right people on board, everything is possible. Seeing the difference that striving for the best possible customer service could make was a true inspiration and a lesson never forgotten. It also led to the start of Innovant Healthcare — a dedicated manufacturer and supplier that always puts your needs first.

Since the beginning, our dedicated professionals have ensured that our customers worldwide have received nothing but top-grade, quality products and related services. We would never settle for anything less. We achieve this goal by continually investing in our team, resources, equipment and processes. Everything is looked at in great detail to make sure we can adapt to any changing demand while ensuring quality never waivers. Exactly what you'd expect from a dedicated team who know the importance of getting every single detail exactly right.

About Us

We are Innovant Healthcare, a manufacturer and supplier of precision dental & surgical instruments. Our product line consists of premium-grade stainless steel instrumentation manufactured to exacting standards. The surgical “feel” of our instruments, the superior cutting ability and the meticulous attention to detail are just a few of the features that allow our products to exceed and stand out from the competition. This catalogue details our extensive offering of instruments necessary to support the innovative surgical techniques and advances.

Our Promise

At Innovant Healthcare, we have always strived for excellence and will always be committed to achieving it in everything we do. To keep this promise to you, we are working non-stop to provide excellence to our customers and every individual linked to our company. We see it as our responsibility to give the whole community an opportunity for a better future, and we will never stop working to make this happen for everyone.

What We Offer

We are specialists in reusable instruments. Our instruments are available for wholesale purchase in large quantities. The instruments are sent packaged and ready to be sterilised. Through our OEM business, we provide private label manufacturing as well. Learn more about all that Innovant Healthcare has to offer in the pages of this catalogue, or online at www.innovant-healthcare.co.uk.

Quality

Our commitment to quality and performance is demonstrated in our quality assured, CE and UKCA marked instruments. Our manufacturing facility is accredited in accordance with the stringent globally recognised quality assurance standards of ISO 9001:2015, ISO 13485:2016, and the Medical Device Directive 93/42/EEC.

Warranty

Innovant Healthcare instruments are guaranteed for five years against manufacturing defects of material and workmanship, when used under normal conditions for its intended purpose. In the unlikely event that any instrument is found to be defective, it will be repaired or replaced at no additional cost. This guarantee does not cover instruments which have become defective through misuse, neglect, or repair by other companies. Our TC cut and TC grip instruments are further guaranteed for five years under normal use. Should any adjustment become necessary during the warranty period, TC cut scissors blades will be re-sharpened, and TC grip needle holder's jaw inserts will be replaced at no additional cost.
