

Congrats on getting your new NK68 HE! We're sure you're going to love it.

When designing this model, we poured our hearts into every little detail—making it comfy, stylish, and packed with tech to be fast and super precise.

Inside, you'll see a quick tour of all the cool features and tricks your NK68 HE can do.

We're proud of this keyboard, and we hope you'll be just as excited about it as we are. Thank you for choosing us!

Nubi <3

help@nubi.gg

If you have any questions about your order or the keyboard itself, just drop a message to our support team—we'll make sure to sort it out for you.

nubi

8,000 Hz / 128,000 Hz is a lot. Why?

8,000 Hz is the keyboard's polling rate, and 128,000 Hz is the PCB's scan rate. In short, it makes the keyboard lightning fast and super accurate!

Pinpoint Accuracy with 0.01mm Step!

Now you can fine-tune the actuation point with 0.01 mm precision—all thanks to the new g3ms Magnetite Ice switches. Smoother, more precise, and more satisfying than ever!

Hot Swap

Hot swap support for all switches and south-facing LEDs. Fully compatible with any keycaps—enjoy customizing the keyboard as much as you like.

Unique Form Factor

Compact and comfortable. We've separated the function key block and arrow keys—easy to find, a joy to use. Made with people in mind.

Gasket Mount Structure

Even with a magnetic keyboard! The plate and PCB mount is unique. We added a little flex that doesn't affect the precision of the magnetic switches. Also, if you like you can switch to Top Mount (everything you need for the change is included, even a prying tool).

Triple Sound Dampening

Two layers of premium foam between the PCB and the plate, plus extra silicone sound-dampening inside the case. The typing sound is clean and satisfying with that signature 'thocky' feel. Now on a magnetic keyboard!

Signature CSA Profile Keycaps

Side-printed legends. Bright backlighting. Our own design. These keys will never fade!

Choose Your Perfect Tilt Angle

Two-level flip-out feet on the backside available for you to adjust the keyboard's tilt to your personal preference.

Extras in the Box

Apart from the keyboard itself, the box comes packed with extras: additional screws, spare gaskets, a 2-in-1 puller, a prying tool, and keycaps. Everything you might need.

Where is Print Screen?

Everything's included! We've added extra keycaps so you can customize the 4-key block to your liking. Need PrtScr or Pause? Simply swap the keycaps and remap the keys in the Nubi web software.

Actuation Point Highlighted in Real Time

Not just an indicator—a multifunctional LED strip. It shows keypress depth, switch actuation point, active mode, and other keyboard settings.

Snap Tap? Yes!

Turn on Snap Tap with one move. No software. Perfect for esports and shooters.
