ENGINEERING, UNLEASED

Blacksheep Power is a new limited run Motorcycle brand with focus on total engineering of new vehicles for riders who want the absolute pinnacle of engineering excellence. Every part of these bikes is engineered from scratch with only suspension and brakes components bought from top quality suppliers.

Our Bikes militantly follow the ethos of "form follows function" with no extraneous covers or parts to hide the engineering. This produces bikes with raw performance with cutting edge patented technologies that are beautiful.

“ WE DON'T BUILD QUIET, BORING MACHINES.
WE BUILD MOTORBIKES THAT FEEL ALIVE.”

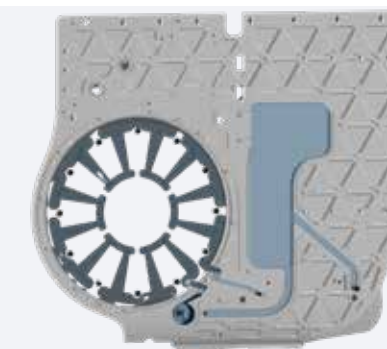

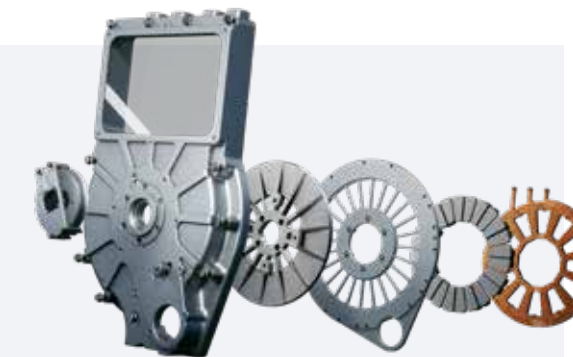

THE BLACKSHEEP ONE
THE BLACKSHEEP ONE
THE BLACKSHEEP ONE

The Blacksheep ONE is our first electric motorcycle, engineered from billet to deliver uncompromising performance and precision. Every detail - from its wire-free power system to its integrated cooling - follows a form-follows-function philosophy that removes excess and puts engineering at the forefront. Built in limited numbers, it's made for riders who value craft, performance, and a machine with true individuality.

CORE TECHNOLOGY

BilletFlux™

Patented stator design using solid billet copper, CNC-machined for maximum cross-section. Delivers perfect consistency, higher copper density, and reduced resistance - lowering heat in high-power applications.

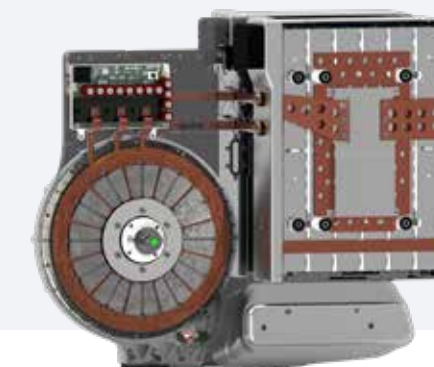

BilletFlow™

Integrated cooling system with channels machined directly into billet housings. Eliminates hoses, maximises heat removal, and ensures reliability under sustained performance.

BilletPower™

Wire-free power delivery. Energy flows through billet components from battery cells to stator coils, with integrated coolant pathways - combining strength, efficiency, and clean design.

FORM FOLLOWS FUCTION

On **The Blacksheep ONE**, nothing is covered for style, and nothing is added for effect. By exposing the engineering, riders can see exactly how the bike is built and how it works.

It's not designed to hide the engineering - it's designed to let the engineering do the talking.

CUSTOMISATION
- YOUR CHOICE

Frame ● ●

Available in two finishes, black or grey. Simple, timeless options that set the tone for the whole bike.

Custom finishes are also available upon request at an additional cost.

Seat ● ● ●

You can choose stitching, materials, and ergonomic adjustments to create the right balance of comfort and style.

Custom versions and stitching options are available upon request, with pricing agreed based on customer requirements.

Battery Cover
(Artwork Edition)

Make the bike truly yours with a customizable battery cover.

Options include factory-curated designs developed in collaboration with artists, or a rider-commissioned artwork for one-of-a-kind individuality.

SPECIFICATIONS

Motor type	BilletFlux™ - Designed and Developed Axial Flux Motor
Max speed	130 km/h (80 mph)
Max power	35 kw (47 hp)
Peak torque	700 Nm (516 lbft) wheel torque
Max range	160 km (100 miles)
Battery capacity	6.2 kWh
Battery type	Lithium Ion 21700 cells
Charging time	3 hours
Battery casing	Stainless steel and aluminium
Front brake	Brembo Radial Caliper - 320mm disc (12.6 in)
Rear brake	Brembo Rear Caliper - 240mm disc (9.4 in) Pressure-sensitive regenerative braking with reverse function for low-speed manoeuvring.
Front brake lever	Brembo RCS19
Rear brake lever	Brembo RCS16
Front suspension	Blacksheep triple-clamp design with integrated rear-brake hydraulics. Öhlins upside-down forks, 120 mm (4.7 in) travel.
Rear suspension	Blacksheep cast rear swingarm. Öhlins rear shock with compression & rebound damping, 100 mm (3.9 in) stroke.
Wheel type	Spoked wheels with Excel rims and Blacksheep CNC-milled billet hubs
Front tyre	120/60-17
Rear tyre	150/60-17
Rake angle	24.5 degrees
Wheelbase	1400 mm (55 in)
Seat height	810 mm (31.9 in)
Ground clearance	150 mm (5.9 in)
Weight	180 kg (397 lb)
Frame material	Aluminium
Safety feature	Electronic cut off on front brake system Kill switch
Waterproof standard	IP67

All specifications are based on prototype testing and remain under development. Final production values may differ.

BUILD IT YOUR WAY.
OWN ONE OF ONLY 50.

50 build slots in 2026.

Your journey to owning the Blacksheep ONE begins with a simple three-step process designed for clarity and confidence.

1. Reserve*

Place a £1,000 + VAT deposit to secure your build slot.

Those who complete payment between 15–23 November 2025 during the Motorcycle Live event at the National Exhibition Centre in the UK will enjoy:

- Exclusive pre-order gifts (limited merchandise)
- A £5,000 voucher applied to the final balance

Reservations made after this period will still receive a £1,000 credit toward the final purchase.

Only 50 slots are available worldwide, with production scheduled across 2026.

**All reservations and agreements are completed online.*

2. Customise

Once your slot is confirmed, you'll be invited to configure your bike.

Select your seat, battery, and finish, then sign your digital contract.

A £10,000 + VAT build payment secures your production slot – fully credited toward your total purchase price, which will be detailed in your final agreement.

3. Take Delivery

When your build is ready, we'll contact you to arrange delivery.

At that stage, you simply complete your balance – with all previous payments and eligible discounts already applied.

Then, it's yours – a bespoke machine built to your specifications.
