

# Digital Signage for K-12 Schools

## Why Wallboard?

Implementing digital signage in schools presents challenges like complex software, unreliable hardware, and the need for constantly engaging content. Our mission is to offer a seamless, user-friendly, and cost-effective solution tailored specifically for educational environments.

- Wallboard offers a **fully integrated content editor** with hundreds of editing features for custom formatting and animations.
- **Easy integration** with popular third party apps including CAP protocol integration for instant emergency notifications.
- **Save time with our pre-built templates** that are ready to be customized with your school's branding
- Built-in, **no-code interactivity** makes wayfinding and touch screen content easy
- Best in class **support and customized onboarding** ensures your success

## Benefits

- **Enhanced Communication:** Display urgent updates, event schedules, and important announcements in real-time.
- **Boost Engagement:** Capture student attention with dynamic content like news feeds, weather, and social media.
- **Enhance student experience:** Provide interactive maps and directories to help students and visitors navigate campus buildings and facilities.
- **Promote Campus Safety:** Quickly disseminate critical safety information during emergencies.
- **Streamline Administration:** update and manage your digital signage content with ease saving time and resources, allowing staff to focus on other important tasks.
