

Additional benefits when you need them

We understand that oral health care can be overwhelming for members with special health care needs. That's why your Delta Dental of Iowa plan includes additional benefits for covered members with a qualifying special health care need. There is no age limit for this benefit — it's available for children and adults.

What is a special health care need?

Special health care needs include any physical, developmental, mental, sensory, behavioral, cognitive or emotional impairment or limiting condition that requires medical management, health care intervention and/or use of specialized services or programs.

The condition may be congenital, developmental, or acquired through disease, trauma or environmental cause, and may impose limitations in performing daily self-maintenance activities or substantial limitations in a major life activity.

What's included?

- Consultations that can be helpful prior to the first treatment
- Unlimited exams for any patient deemed to have special health care needs by their provider
- Up to four total cleanings per calendar year
- Coverage for anesthesia/sedation and silver diamine fluoride

How do I use this benefit for myself, my spouse or my dependents?

Let your dental provider know that your group Delta Dental plan includes the Special Health Care Needs Benefit and that you (or your covered family member) have a qualifying special health care need.
