

THE COMPOSTABLE CONDOM

# Slippery Saints

WHILE THE WORLD  
RETHINKS **PLASTIC**,  
**LATEX** REMAINS  
OVERLOOKED.  
WE ARE CHANGING THAT!

PROBLEM

10B

Condoms contribute to  
**non-recyclable waste**  
annually.

PFAS

And harsh chemicals  
found in widely used lube  
and condom brands.

THE COMPOSTABLE CONDOM

The first **100% biodegradable condom** free of harsh chemicals.

Best for planet and people!

## OUR INNVATION

# THE MATERIAL WE HAVE DEVELOPED

Patent pending

+

## NATURAL LATEX

Natural latex is harvested from rubber trees (Hevea brasiliensis), which also act as carbon sinks.

## SECRET INGREDIENT

Our secret component is what makes the material compostable, leaving no trace behind.

Making it **completely non toxic** for the environment and our bodies.

## BUSINESS MODEL

### B2B

#### Licencing

VP: In line with current trends,  
accessing new materials

- material licencing model
- targeted at condom manufacturers

#### Supplier

VP: Health, Sustainability &  
Education
