SOF the school of future

Undergraduate Prospectus 2027

Build first. Graduate *second.*

A three-year undergraduate programme in Kochi. Real businesses, real companies, and immersions into the markets that matter.

Class of 2030

Begins August 2027

30,000

students leave Kerala every year to find a place like this. Until now, they had to.

Why this exists

Families here have had two choices:
a degree at home, or a flight out.

The School of Future started in Kochi with a postgraduate programme, building real businesses and taught by the people who built them. From August 2027, the same school runs the undergraduate years.

From August 2027, they *don't.*

Not a college. A school where the work is *real* from the first month.

Duration

Three years, full-time, in Kochi. Two of the six terms are spent inside real companies.

Who it is for

Anyone finishing Class XII, in any stream, with or without Maths. Board marks matter less here than what you have already tried.

The class

One hundred students.
The Class of 2030.

Begins

August 2027. Applications are open now.

You graduate with

The SOF Certificate Program, and the option of a UGC-recognised BBA from Jain (Deemed-to-be) University in online mode, taken as your own enrolment in parallel.

And a portfolio of real work: three capstones, three immersion briefs, two company evaluations.

You will have started at *seventeen.*

17

Your first customer

In week three, you join a team of four or five with six weeks to earn your first real rupees.

18

Something you launched

A venture on a seed budget, or a live problem inside a real company. Either way, it has to hit a number someone outside SOF can check.

20

A real company's mandate

Two full terms inside real companies, on real briefs, graded by them. Then a problem you own, presented to the people who live with the result.

Three years, in five numbers

20	12	3	3	2
Core modules for everyone	Electives, chosen with a mentor	Capstones, rising stakes	Immersions	Co-Builds in companies

Two terms inside real companies. You own *the work.*

Most work placements

You watch and assist.

A Co-Build

You own a scoped brief for a full term, and the company grades your work.

Year 3 is spent inside real companies, on real briefs, evaluated by them. Co-Builds are arranged by SOF with its partner companies, not chased by you.

You leave with

A portfolio	Three capstones, your immersion briefs, and two Co-Build evaluations written by the companies themselves.
Four open routes	A job, your own venture, the family business, or postgraduate study.

Six markets. Three immersions. You choose *where you go.*

Singapore

How a mature market runs

A week inside regional headquarters, and a brief on what it would take to run that model here.

Vietnam

Where the supply chain is moving next

Factory floors and export economics, as a country absorbs work moving out of China.

Dubai

Where the money moves

Capital, trade and family succession, in the corridor your family probably already knows.

London

How old capital still moves

A week inside the City: regulation, institutional finance, and a live challenge with a host firm.

China

Scale India has not seen yet

Manufacturing at volume, platform businesses, and what happens when capital, policy and speed move together.

Bharat Corridor

How India actually makes and sells

Two weeks west and north. Factory floors in Surat and Morbi, and pricing in markets nothing like Kochi.

Immersions are billed at cost, with no margin on travel. A student who cannot travel takes an equal-credit fieldwork brief instead.

Mentors at SOF are not guest speakers. They are *co-builders* of judgement.

100+ founders, CXOs and operators on the bench. You learn from people who have built companies, raised capital and led real decisions under pressure.

Founders · CXOs · CMOs · VCs · Technologists · Economists · Operators · Policy Makers · Lawyers · Investors · Creators

And resident faculty, every week.

Five resident faculty teach the core in fixed morning slots: accounting and finance, economics, data and modelling, communication and writing, and management.

Google · TESLA · LUKER · thoughtworks · ORACLE · Godrej Properties · stripe · amazon · Victoria's Secret · TCS Tata Consultancy Services

Mentor sessions

Review cycles

Demo days

How *admission* works.

1 Apply

Apply online. Tell us about your work, your interests, and why you want this.

2 Aptitude and problem solving

A short round of reasoning and problem solving questions. Thinking, not memorising.

3 Simulation day

Come in for a half day on campus. You run a company's problem in a team, and we watch how you think.

4 Decision

An offer, and a discussion with your parents about how SOF could be a good fit for you.

Programme begins August 2027. One hundred seats.

Who can apply

Class XII from any board and any stream, with or without Mathematics. Results awaited is fine; offers are conditional until they arrive.

Four rounds

Round	Applications close	Offers rolled out
Early round	15 Nov 2026	by 20 Dec 2026
Round 1	31 Jan 2027	by 28 Feb 2027
Round 2	30 Apr 2027	by 31 May 2027
Final round	15 Jun 2027	by 5 Jul 2027

You finish with *two things.*

One says what you can do. The other says you have a degree.
Most programmes make you choose.

The School of Future

SOF Certificate Program

Backed by your work portfolio: three capstones, three immersions, two Co-Builds, and the businesses behind them.

Assessed by
Live outcomes and practitioner panels

Jain (Deemed-to-be) University

BBA degree

An optional, UGC-recognised degree from Jain (Deemed-to-be) University, in online mode. It is your own enrolment with the University, taken in parallel.

Assessed by
One online examination per semester, set by the University

Fees and scholarships

₹18 lakh across three years, with merit scholarships of 10% to 50% and education loan options. Write to us for the full fee sheet.

The University runs its own admission and examinations, and confers the degree. SOF's calendar protects a dedicated window every other week so you can clear it comfortably. You can check Jain's listing on the UGC-DEB portal at deb.ugc.ac.in.

Seventeen is young. We built the campus *knowing* that.

Every student has a Programme Resident, one for every ten, who knows their name, their work, and your number. Attendance is taken daily. Campus hours are 8:45 to 17:00, Monday to Friday; anything outside them is a scheduled activity you are told about a week in advance. Immersions travel in groups with senior SOF staff, travel insurance, and a named contact for parents throughout.

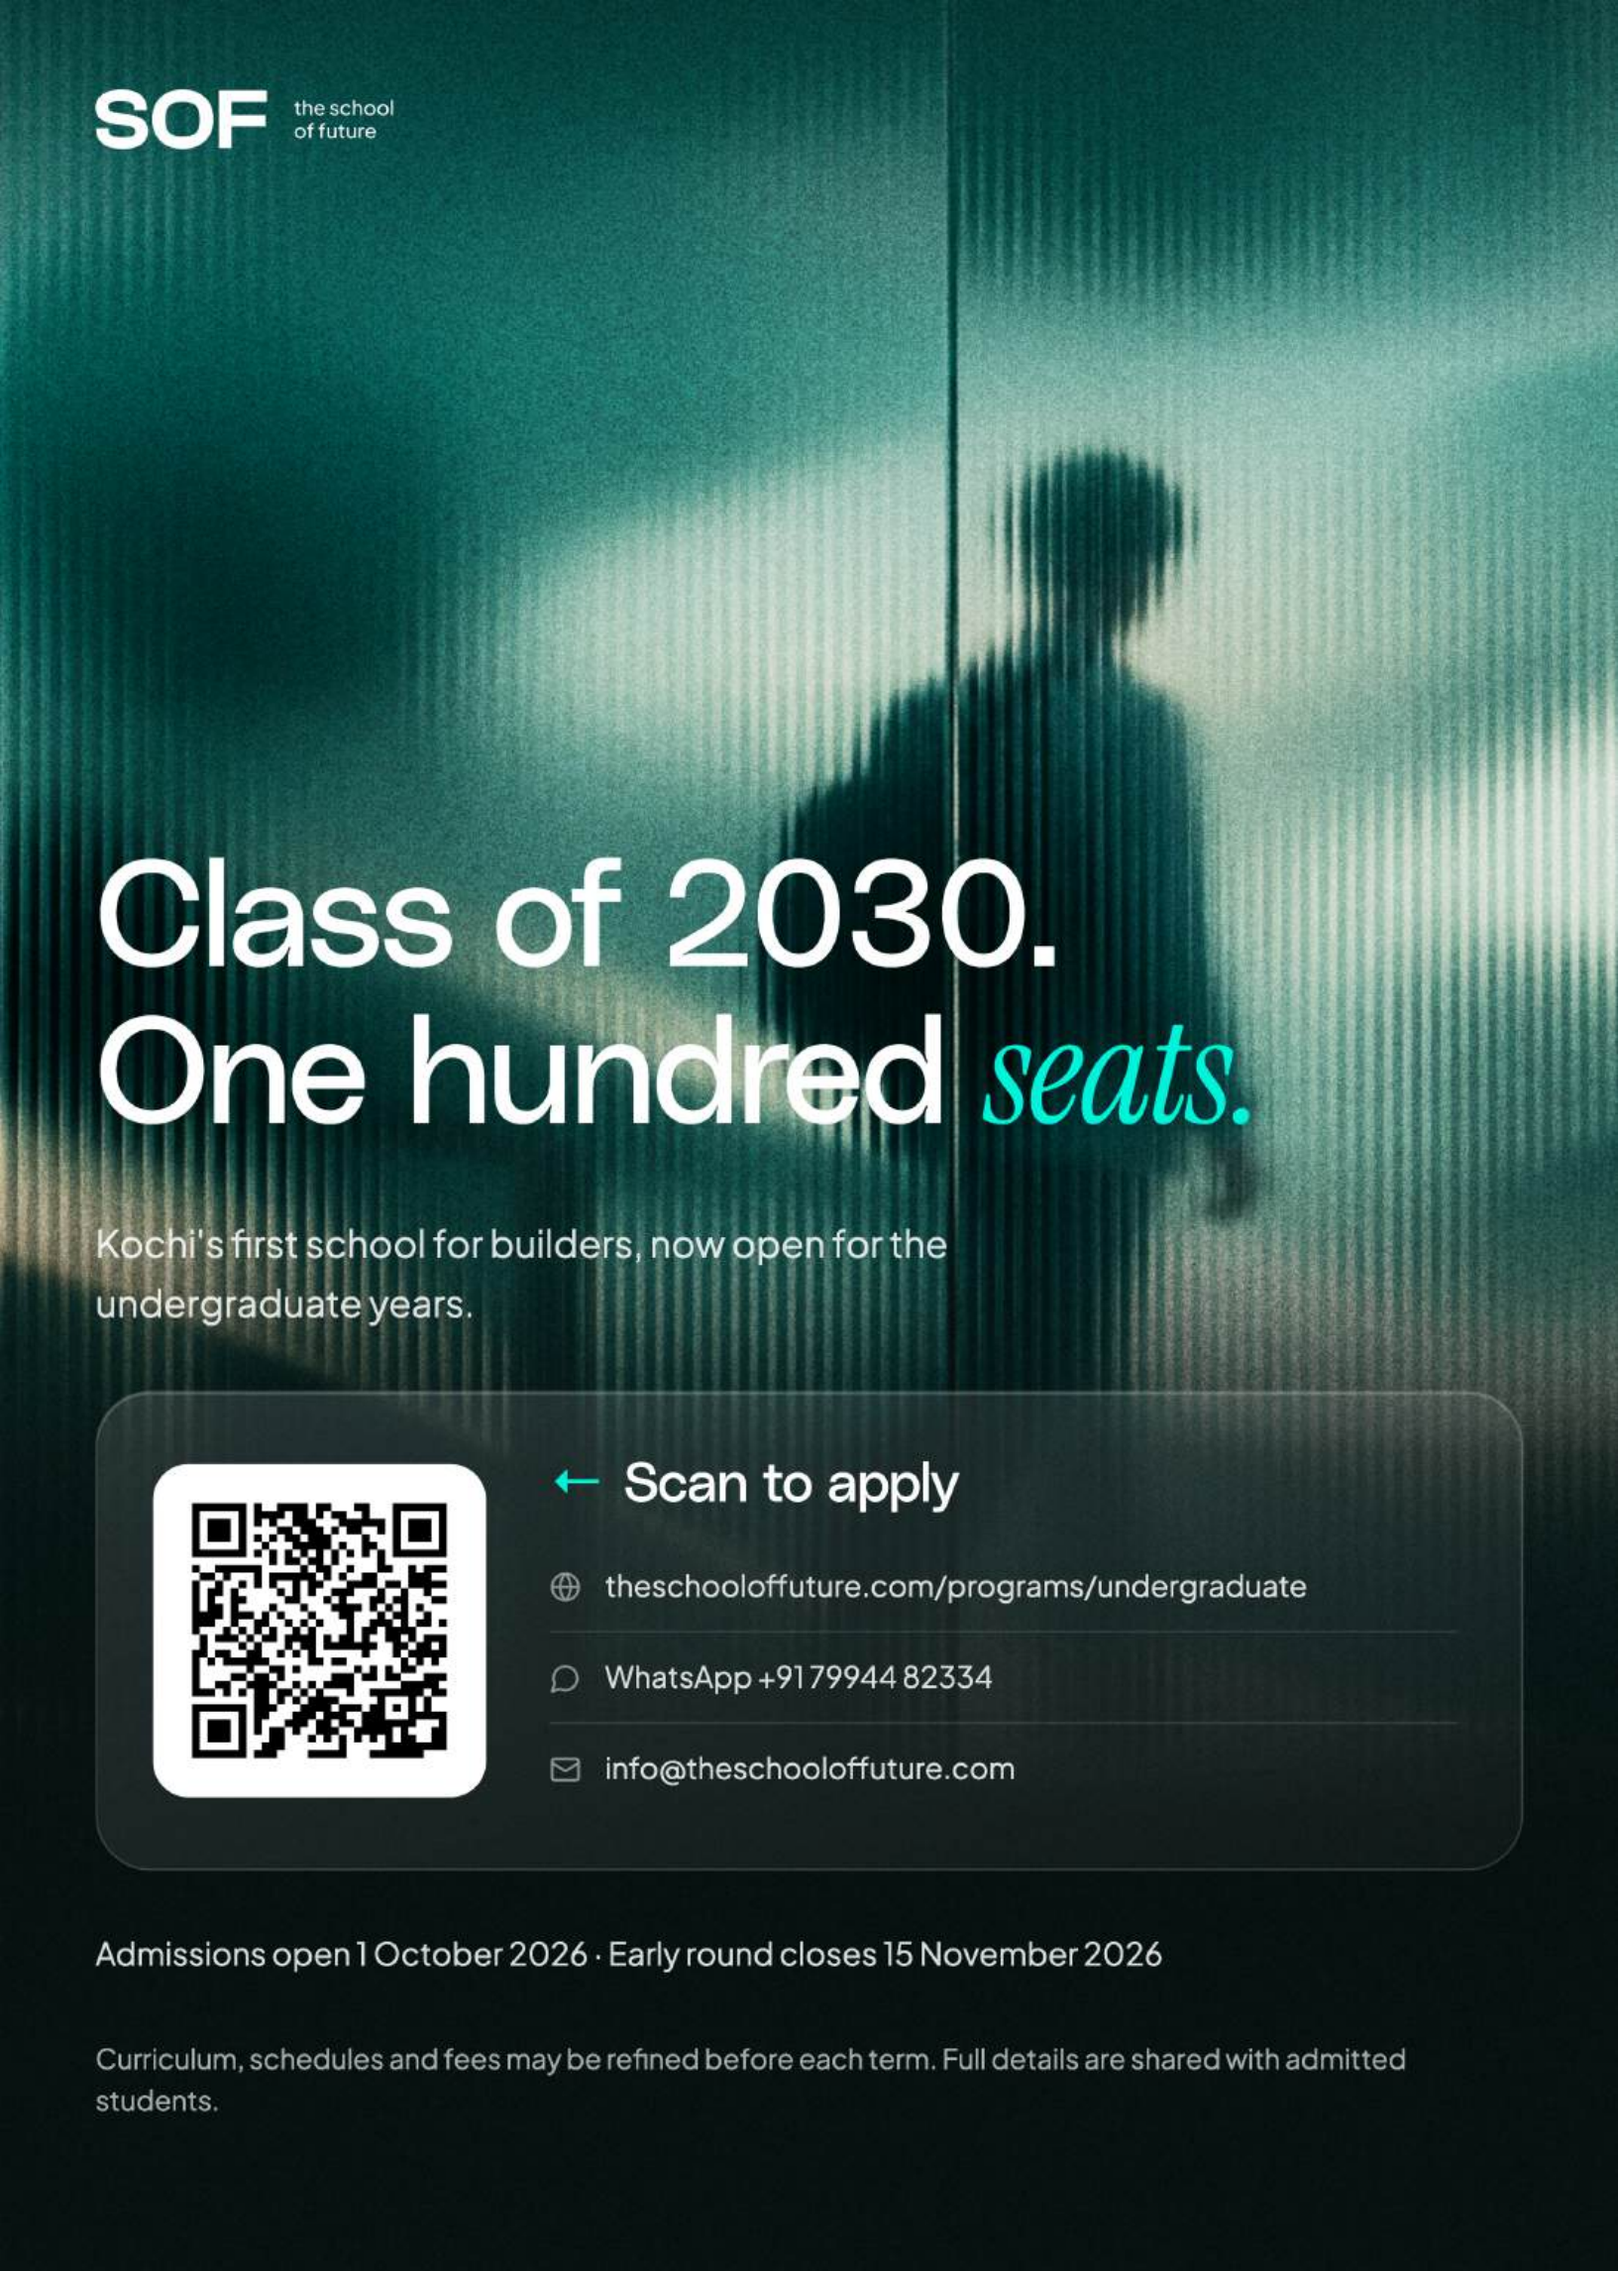

1:10
A Programme Resident for every ten students

Daily
Attendance, taken every day

One
Number to call, answered by someone who knows your child

How you hear from us

A short written note on your child's work at the end of every term, from the Programme Resident who sees it. A parents' evening on campus each October. One number to call, answered by someone who knows your child.
