

Aticelca® 11881-0001

### SUSTAINABILITY: ALWAYS IN OUR DNA

We deeply believe in the idea of sustainable development. For us, the natural environment is not just a part of our work — it is a shared value that must be protected and nurtured.

By using FSC®-certified materials and Plastic Free® solutions, we guarantee:

- waste minimization.
- responsible use of resources,
- and a contribution to a better future for our planet and our entire community.

### A. Height is not a problem

The system has been designed to accommodate bottles with a maximum height of up to 330 mm. Bottles such as Renana or Bordeaux types with high shoulders pose no challenge.

### B. Also suitable for larger bottles

During the design process, larger bottles — such as Champagne or sparkling wine models — were also taken into account. Bottles with a diameter of up to 100 mm fit perfectly without any issues.

### C. Less cardboard means much better

The Nakpack® philosophy is based on using cardboard only where it is truly necessary. A full year of laboratory research and testing with major carriers has allowed us to develop the best possible solution.

### D. Enhanced Reinforcements

Each bottle is supported by a double, continuous, and offset locking structure, specifically engineered to ensure maximum flexibility and resilience of the entire protective system.

### **E. Optimized Protective Inserts**

The top and bottom inserts feature increased spacing compared to any other system on the market. Their variable geometry has been carefully designed to absorb shocks at the most critical and impact-prone points, providing superior protection during transport.

### F. Double-Layer Base and Walls

The base and side panels are made with (an double reinforcement using micro-triple cardboard, forming a dual-wall construction capable of absorbing even the most severe impacts and drops.

NAKPACK\*

When it comes to protecting your bottles from potential damage during transport, having top-quality packaging is essential. That's why we continuously design and refine our bottle-shipping systems — among the safest on the market today.

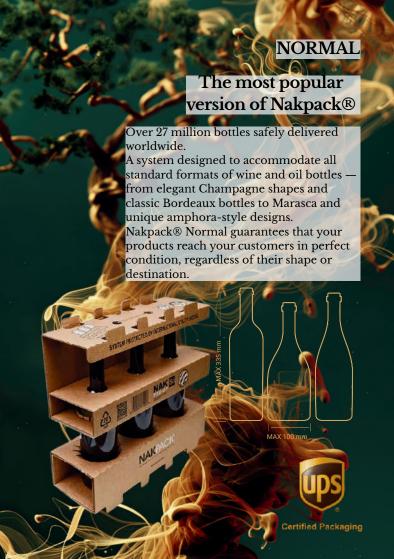

According to a study conducted by the European Commission, three of the ten main reasons consumers lose trust in online shopping are delayed deliveries, damaged goods, and incomplete orders. This clearly shows how crucial reliable transport is in building longterm, trust-based relationships with customers.

That's why our Nakpack® system is tested in accordance with strict international standards.

Protecting yo<mark>ur pro</mark>ducts with secure packaging brings your compa<mark>ny numerous</mark> benefits:

- Higher profits through reduced damage-related losses,
- Fewer complaints and product returns,
- Greater customer satisfaction,
- Enhanced brand reputation through deliveries that always arrive in perfect condition.

### HOW SAFE ARE YOUR SHIPMENTS?

We created the new Nakpack® EXTREME line starting from a simple question: what else can we improve?

Our goal has always been to offer a reliable alternative for transporting delicate products — one that provides the same level of safety while using as few resources as possible. In this way, "less" becomes "more."

Made from over 70% recycled paper, Nakpack® EXTREME is an innovative, patented system for your shipments.

Its simple and quick assembly of internal protections, combined with a solid modular structure capable of absorbing even the toughest accidental impacts, makes our system one of the best solutions for safely transporting bottles and other fragile products.

Our philosophy is to use paper only where it is truly needed.

More than a year of laboratory research and tests conducted with major international carriers have allowed us to create the most effective solution.

Lightweight yet strong, Nakpack® EXTREME is today the safest and fastest solution available on the market.

#### NAKPACK® EXTREME

### SAFE PROTECTION SYSTEM FOR YOUR SHIPMENTS

- Universal protection, usable both on top and bottom, fully interchangeable
- Ultra-fast assembly thanks to pre-folded and glued inserts (just 2 seconds)
- Minimal contact with bottle labels
- Up to 25% warehouse space savings compared to standard Nakpack® protections
- ISTA3A-certified safety, recognized by the world's leading carriers (International Safe Transit Association)
- Made from FSC®-certified paper, confirming responsible and sustainable forest management
- World's first 6-bottle-based solution
- Internationally patented design

## NAKPACK EXTREME

# SAFE PROTECTION SYSTEM FOR YOUR SHIPMENTS

Designed specifically to maximize speed and simplify all order fulfillment operations.

This solution is exceptionally simple and fast, yet extremely flexible, allowing the packaging of every standard wine bottle type available on the market today.

Exceptionally sustainable — made from FSC®-certified paper, ensuring the responsible origin of raw materials in compliance with strict environmental, social, and economic standards.

Extremely safe — thanks to ISTA3A certification.

Now you surely understand why we called it Extreme.

## ista3A

All packaging includes internal protection and a matching outer box. Eco-contribution (CONAI/BDO equivalent), pallets, and VAT excluded.

DELIVERY FROM OUR WAREHOUSE.

## NAKPACK SAFETY AT YOUR SERVICE

When companies look for solutions, we respond with innovation. Nakpack® Custom is a division created to meet the specific needs of those who ship fragile products, aiming to completely eliminate the risk of damage while caring for the planet.

A dedicated R&D team with over 15 years of experience in glass bottle transportation develops customized solutions to effectively protect your products.

ista3A

- 6 Key Stages in Developing a Custom Product:
  - 1. Analysis of customer requirements and needs
  - 2. Cost-benefit evaluation based on production volumes
  - 3. Design and prototype creation
  - 4. Impact testing in accordance with international standards
  - 5. Product validation
  - 6. Production and delivery

- √ Dedicated consulting and fast support
- √ Design of eco-friendly packaging certified Plastic Free®, minimizing resource consumption and unnecessary paper waste
- √ Maximum optimization of warehouse space
- ✓ A level of safety and performance that only Nakpack® can guarantee

### **MAGNUM**

This model has been specially designed for larger formats with a capacity of 1.5 L.

Quick and easy to assemble, it ensures convenient unpacking and maximum safety during transport, even under the most demanding conditions.

All packaging includes internal protection and the corresponding outer box. Eco-contribution (CONAI/BDO equivalent), pallets, and VAT excluded.

DELIVERY FROM OUR WAREHOUSE

### CUSTOMIZATION

Full customization of the entire packaging system is available — both the outer box and the internal protection.

### MINIMUM QUANTITIES AND COSTS

- Outer box: 1,120 pcs per model 0.55 each
- Internal protection: 10,000 pcs per model 0.34 each

Printing plate costs are excluded and charged only once
— for the first order.
