Primer

Trusted, reliable AI for the world's most critical organizations

Why Primer?

In today's evolving threat landscape, rapid and informed decisions are crucial. Primer equips defense and intelligence leaders with AI solutions that transform vast amounts of data into actionable intelligence—providing the speed and reliability needed to stay ahead.

What we deliver

Deployed by the U.S. Army, U.S. Air Force, Intelligence Community, and Fortune 100 companies, Primer's AI software automates the processing and analysis of complex data, ensuring timely and accurate insights in your preferred environment.

Proven use cases

All-source intelligence cycle

Accelerate the intelligence cycle by streamlining the processing and analysis of large data volumes, delivering actionable insights faster.

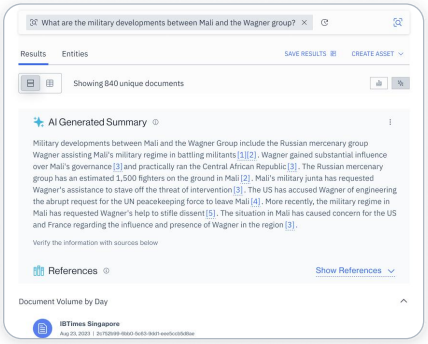

Operations & readiness

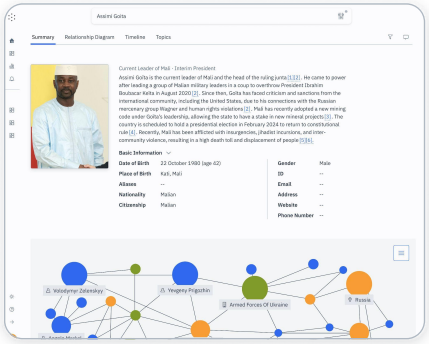

Enhance situational awareness by analyzing force readiness data, guiding courses of action and informing decision-making.

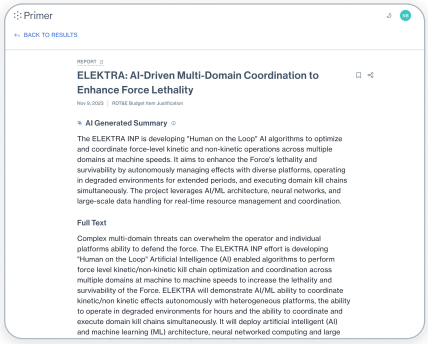

OSINT analysis

Analyze vast amounts of social media and news in near-real-time to understand public discourse and identify disinformation and threats.

Core capabilities

Search

Instantly uncover key insights by asking questions in everyday language or using Boolean queries. Primer's AI scans millions of documents, delivering precise answers to keep you informed.

Explore

Discover hidden trends and insights with self-updating visuals, such as network graphs, entity profiles, maps and timelines, helping you anticipate and counter emerging threats.

Enable

Quickly compile and distribute actionable intelligence, ensuring your team remains ready to act. Seamlessly integrate with existing enterprise tools and systems.

Key differentiators

Unmatched accuracy
Our fact-checking technology captures over 99% of errors before they reach users, ensuring all intelligence is based on verified data.

Deep domain expertise
Primer's AI solutions are purpose-built for national security customers, meeting mission-critical requirements even in air-gapped environments.

Proven success
Our technology has been deployed in complex environments for U.S. defense and intelligence customers, demonstrating its real-world value.

Secure deployment
Primer has an ATO on JWICS and meets all IL5 accreditation requirements through our deployment on Palantir's FedSTART/Mission Manager platform.

Strategic partnerships
We have a robust ecosystem of partners, enabling us to deliver tailored solutions quickly and at scale.

Simplified procurement
We have deep expertise in federal contracting and offer a wide range of marketplaces to procure our offerings.

Who we are

Primer's team includes leading experts in AI and data science, with over a century of experience in government technology and front-line public service.

Select federal advisors
