Debra's Graceful Upgrades

It's been almost 10 years since *Will & Grace* signed off. But star Debra Messing's comic genius shows no signs of slipping as she headlines NBC's *The Mysteries of Laura*. Also enduring? Her flawless face! At 47, the Emmy-winning

mom of one is catching kudos for her radiant, time-defying appearance. "Debra looks lovely and refreshed," observes Beverly Hills plastic surgeon Dr. Ben Talei (visit beverlyhillscenter.com for more info). "She's aging very gracefully."

As for the mysteries of Debra's eternal youth, the doc credits fillers in her cheeks and nasolabial folds "to soften them" and neuromodulators such as Botox to "smooth and lift her forehead" and to "treat the lines around her mouth." She seem-

ingly didn't stop at plumping injections, though. "Her nose has several signs that indicate it has most certainly been operated on," notes Dr. Talei, who does not treat the actress. Nashville, Tenn., plastic surgeon Dr. Nicholas Sieveking

— who also doesn't call the actress a patient — agrees, saying the "surgery has left her nasal tip and nostrils uneven and the dorsum [nasal ridge] a bit crooked." Still, insists Dr. Talei, "Debra is so stunning, no one even notices!" **LS**

FOREHEAD

"The likely placement of Dysport or Botox has helped give a smoother appearance and kept the brows elevated, showing off Debra's lovely eyes," says LA's Dr. Ben Talei. Cost: \$2,000 a year.

NOSE

While Debra has never looked anything short of gorgeous, "An apparent rhinoplasty has given her nose an 'operated-on' look," observes plastic surgeon Dr. Nicholas Sieveking. Price tag? \$12,500.

CHEEKS

"It appears that fillers have been placed into the cheeks and folds around the mouth [up to \$3,000] to help smooth out the shadows formed as the cheeks descend with age," notes Dr. Talei.

JAWLINE

"It looks as if she's had fillers in the pre-jowl area [on either side of the chin] that made her jaw appear more square," says Nashville's Dr. Sieveking. Injections run \$2K and up.
