

KNIFESTYLES OF THE RICH & FAMOUS

2002

SKIN

"Jamie-Lynn's skin looks tighter and has improved texture — likely from laser resurfacing and/or Ulthera," observes Nashville, Tenn., plastic surgeon Dr. Nick Sieveking. "Good work!"

NOSE

"Her nose seems to be thinner and more refined, in a natural way," notes NYC plastic surgeon Dr. Michelle Copeland. "It looks like a well-done rhinoplasty [upwards of \$12,500]."

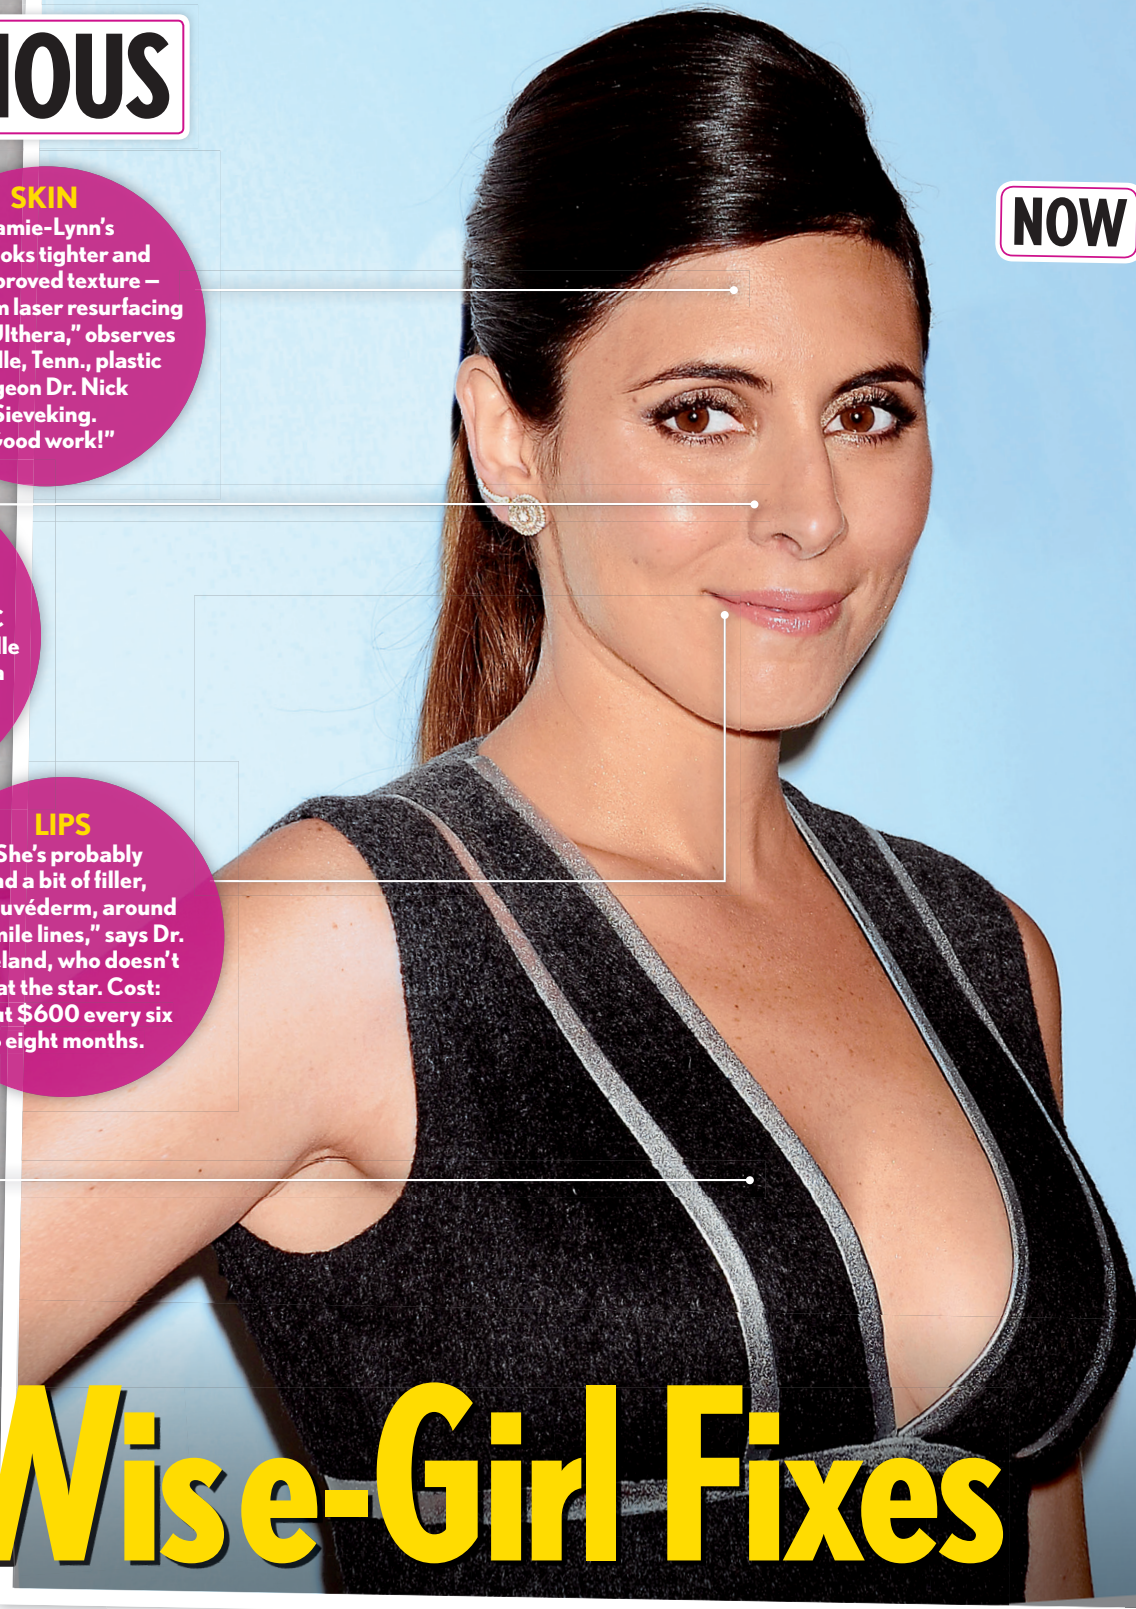

LIPS

"She's probably had a bit of filler, like Juvéderm, around the smile lines," says Dr. Copeland, who doesn't treat the star. Cost: about \$600 every six to eight months.

BREASTS

Bada bing, bada boom! "She has a fuller, perkier look, with more cleavage definition," shares Dr. Sieveking of Jamie-Lynn's likely breast enhancement. Implant surgery runs \$8K to \$15K.

NOW

Jamie-Lynn's Wise-Girl Fixes

As Meadow Soprano on HBO's long-running mob hit *The Sopranos*, Jamie-Lynn Sigler navigated some seriously dark plotlines. Offscreen, the actress had drama she'd like to fuhgeddabout, too — namely, a teenage eating disorder

and a marriage that ended two years before the series did. Now, at 34, she's reinvented herself. Along with lighter roles and a happy family life that includes son Beau, 2, and fiancé Cutter Dykstra, 26, Jamie-Lynn is rocking a more polished

look. A look that experts say is likely the result of boss cosmetic upgrades. "She appears to have had a nice, natural breast augmentation and a rhinoplasty [nose job]," observes Nashville, Tenn., plastic surgeon Dr. Nicholas Sieveking, who does

not treat the brunette beauty. "Her breasts look perky and youthful, but not too big. Unfortunately, though, her nostrils and columella [nasal tip] are a bit uneven now." Complexion-wise, however, Jamie-Lynn again gets high marks. Her skin dis-

plays "improved texture, likely from fractional resurfacing," as well as "evened-out color tone," which is achieved by broadband light therapy, shares Dr. Sieveking. "Her aesthetic work is good and appropriate." And worthy of a (Mafia) princess! **LS**

The Man's View

BEFORE OR AFTER APPARENT BUTT BOOST?

Nicki Minaj

"Oh my gosh, look at her butt!" Those aren't just lyrics to the sexy rapper's hit "Anaconda." It's the general reaction to Nicki's plumper, rounder derriere since 2008 (left). The singer has never confirmed having implants, but there's no denying, she's got buns, hon! "People are sitting in the barbershop talking about my butt," the 33-year-old has said. "I don't mind the fascination!" And fascinated is exactly what most of the men we polled claimed to be.

MIRACLE IN A BOTTLE

ANTIAGE LIKE A FINE WINE

Resveratrol (the antiaging compound found in red grape skins) isn't limited to merlots and cabs. It's also in this breakthrough serum, which helps skin increase production of volumizing hyaluronic acid by over 200 percent. Cheers to that!

Caudalie Resveratrol Lift Firming Serum, \$82, caudalie.com
