

# Cathro & Partners

---

Founded in 2021, Cathro & Partners is a rapidly growing insolvency and restructuring firm operating across Australia. When setting up the firm, Turnkey IPS was selected as the case management platform to support efficient workflows and future growth.

## Challenge and solution

---

As a new firm adopting a new system, Cathro & Partners faced the typical early-stage challenges of setup, configuration, and user adoption. In the initial stages of using IPS, the team encountered limitations around task creation and accessing relevant precedents across different appointment types.

Working closely with Turnkey's support team, these challenges were addressed through tailored configuration and guidance. With responsive, hands-on support, Cathro & Partners were able to build streamlined, customised workflows aligned to their operational needs, enabling the team to work more efficiently from the outset.

## Results & Benefits

---

Clear visibility of matters and outstanding tasks through dashboards

Customisable tasks and templates to suit firm-specific requirements

Improved reporting to support daily workflow management

Ongoing support and training to maximise system value
