

FTI Consulting

Founded in 1982, FTI Consulting is a global business advisory firm supporting organisations through complex financial, legal, operational, political, and regulatory challenges. In 2022, the firm migrated from IPS SQL to Turnkey IPS on Cloud to improve efficiency, accessibility, and automation.

Challenge and solution

FTI Consulting identified the need to modernise its insolvency technology to support scale, efficiency, and evolving operational demands. A key driver was the integration of the Transaction Processing System (TPS), which required a more flexible and cloud-based platform.

The migration began with a detailed discovery phase, including in-depth analysis of existing IPS SQL usage and requirements. A sandbox environment enabled hands-on training and risk-free testing, ensuring users were confident and prepared ahead of go-live. With Turnkey's support, the transition to Turnkey IPS was completed smoothly and efficiently.

Results & Benefits

Cloud-based flexibility, enabling secure access from anywhere

Microsoft 365 integration for simpler, more secure access

A user-friendly interface that enhanced productivity and user adoption

Continuous improvements through regular updates
