

Experian for Turnkey IPS

With the Experian Smart Feature in Turnkey IPS, you can run direct creditor reports instantly, within Turnkey IPS dashboard - no manual entry, no external requests, and no context switching. Your team gets real-time accurate credit data, turning a complex process into a seamless click.

Seamless process, tangible advantage

Getting the most out of the Experian integration is effortless:

Start your case as usual in Turnkey IPS, and enter your client's name and details.

Run the Experian check and watch the magic happen - the system instantly queries Experian to safely pull up-to-date creditor data.

Your team now sees the full list of creditors, full reference account numbers, and balances at a single glance, all within the system.

Verify client liabilities faster, with less admin

Capture debt data securely

In a PCI-compliant environment retrieve full reference account numbers and creditor details. Instantly establish a client's liability baseline, eliminating manual entry and security risks.

Reduce manual admin

Receive current debt balances directly in the Turnkey IPS dashboard, cutting waiting times and freeing your team to focus on what matters.

Simplify complex cases

Obtain accurate debt data for bankruptcies and trust deeds with a single click, streamlining even the most challenging scenarios.
