Multiple responses: percentages sum to more than 100.

Letters indicate a proportion significantly higher than the lettered column at the 95 percent confidence level (two-tailed), tested on effective bases; columns with fewer than 30 effective cases are not tested.

Surrey respondents are weighted to 2021 Census age and gender.

Leaners included: respondents who did not know whom they would vote for when first asked were asked whom they were leaning toward, and that answer is counted. Decided voters are those naming a candidate. Definite voters say they will very definitely vote or have already voted.
