

# AMPX

Data Sheet

## Key Features

# AMPX Series

### When Performance Matters, Power it With AMPX

The AMPX series is a robust line of single-channel power amplifiers built for high-demand public address, background music, and paging systems. With power ratings ranging from 260W to 1000W, the series supports both constant voltage (70V/100V) and low-impedance (4-16Ω) speaker systems. Engineered for clarity, reliability, and protection, AMPX is the ideal choice for scalable audio amplification in commercial, institutional, and industrial environments.

### Tough Build. Smooth Sound.

The AMPX series features a 19" rack-mount design with a durable aluminum panel, RCA and XLR I/O for flexible connections, and advanced protection circuits against short circuit, overload, DC, and overheating. A smart cooling system and soft-start function enhance safety and reliability.

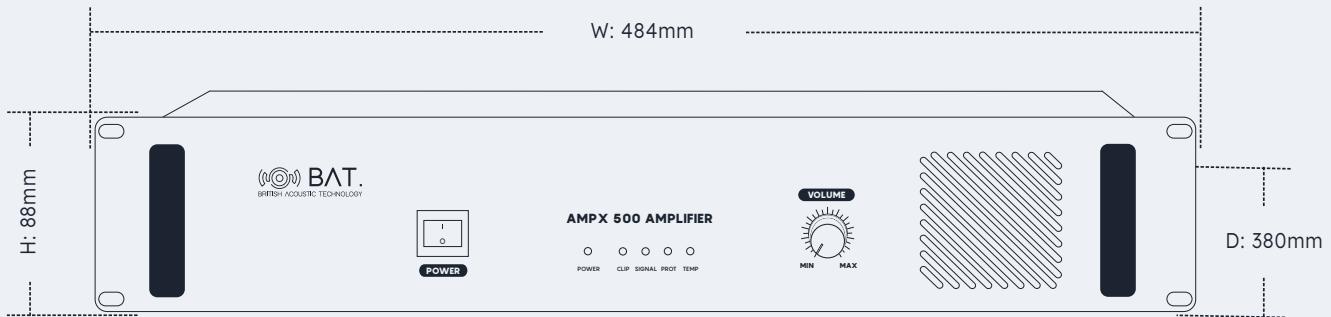

### Sound That Performs. Features That Matter.

Powered by high-performance transistors, it offers clean, low-distortion sound with a wide frequency range. A 5-segment LED meter and volume control allow for simple monitoring and operation, making it ideal for commercial, educational, and public installations.

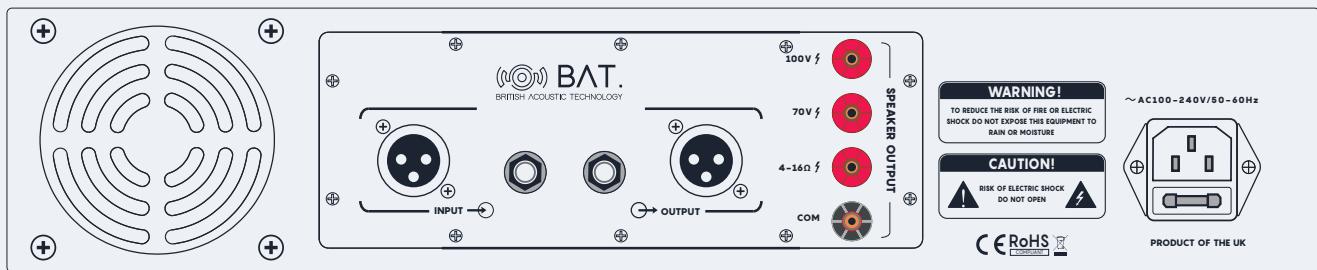

# Technical Specifications

Unit	AMPX 260	AMPX 500	AMPX 1000
Rated Power:	260W	500W	1000W
Output Terminals:	4-16Ω & 70V / 100V		
LINE Input:	770mV / 10K Ω, Unbalanced 6.35 Interface		
Freq Response:	50Hz~18kHz ±3dB		
THD:	<0.5% at 1kHz, 1 / 3 Rated Power		≥90dB
S/N:	≥80dB (A-Weighted)		
Controls:	1 Volume Control, Power On / Off		
Power Supply:	~220V / 50Hz / 60Hz		~220V / 50Hz
Power Consumption:	460W	850W	1800W
Dimension (DxWxH):	380x484x88mm		450x4484x132mm
Net Weight:	12.5kg	15kg	27.8kg
Gross Weight:	13.5kg	16.5kg	31.6Kg
