

BLOQ

Data Sheet

BLOQ 5

Ultimate All-Weather Sound

The BLOQ series is a compact all-weather speaker engineered for commercial applications. Built to deliver stunning sound quality in harsh environments, it meets the IEC529 IP55 standard with a robust ABS cabinet and flexible installation options powered by 70-100V or low-impedance.

Big Sound, Built to Weather It All

The BLOQ series delivers uncompromised performance as compact all-weather speakers engineered for both indoor and outdoor environments. Built to meet the IEC529 IP55 standard, they offer robust dustproof and waterproof protection while delivering stunning sound quality with clear treble and powerful bass.

Engineered for Clarity, Built for Every Space

This thoughtfully designed lineup guarantees reliable, high-fidelity audio performance in dynamic public spaces, meeting rooms, and other challenging installations.

Technical Specifications
